FORECASTING AND PLANNING REFERENCE GROUP (FPRG).

Subject:	Focus areas for 2017
Agenda Item:	4
Paper #:	Cover page 2.
Contact:	Matt Armitage (AEMO)
Date:	Tuesday 21 March 2017

1. EXECUTIVE SUMMARY

Item raised by:	AEMO
Rule requirement:	NER 5.20 National Transmission Planning NER 3.13.3 (q) NGR 135K to 35KD
Link to National Objectives:	The objective for the new integrated electricity and gas publications is to provide an independent, strategic development plan to maintain energy security and reliability for consumers at lowest long term cost while meeting government policies.
Previous forum discussion(s):	At the first FPRG in February 2017, AEMO introduced the proposal to consolidate a number of existing Planning and Forecasting publications into a program that integrates gas and electricity modelling to provide strategic energy insights to stakeholders on a quarterly basis, or following major industry events.
Purpose:	Open discussion between AEMO and participants on what focus areas the 2017 electricity and gas publications should capture.
Desired outcome:	For AEMO and participants to have collated a list of key areas for AEMO to focus on for the 2017 electricity and gas publications.
Link to documents:	N/A
