PROCEDURE CONSULTATION

WORKPACK 2 PARTICIPANT RESPONSE TEMPLATE

***Participant**: ActewAGL Distribution*

***Completion Date**: 11 November 2016*

Table of Contents

1. Glossary and Framework 3
2. Default & Deregistration Procedure (MP, MDP, ENM, MC) 4
3. Exemption Procedure (Metering Installation Malfunctions) 5
4. MSATS Procedures: National Metering Identifier 6
5. Qualification Procedure 7
6. Service Level Procedure – Embedded Network Manager 8
7. Unmetered Load Guideline 9
8. Other Issues Related to Consultation Subject Matter 10

1. Glossary and Framework

Please delete any rows where there are no particpant comments

(note: only sections that have changed as part of Work package 2 are listed in the table below)

Clause	Heading	Participant Comments
1.3	Related AEMO Documents	Section 1.3 – should also include the new B2B Guide version 1.0 (Note the release of the Glossary with B2B Procedures on October 27, 2016 includes the B2B Procedures, Technical Design Specification, but not the B2B Guide)
2.2	Structure of Retail Electricity Market Procedures	Section 2.2.2 – should this also include the new B2B Guide version 1.0 with comments similar to the NMI Procedure in section 2.2.3 (e) – eg It is not required to be *published* under the NER, yet it is a critical explanatory document.
4.2	MSATS Code: Use of ENM	While this was not a section listed, the wording in this paragraph is a bit clunky as currently written – perhaps review the following in conjunction with the changes being made due to Work Package 2:- There should be no confusion in most cases where the MSATS code 'LNSP' is used. Where it is used in the context of *embedded networks*, however, the same code will be used to refer to ENMs. The Retail Electricity Market Procedures will continue to refer to 'ENM' to identify the *Embedded Network Manager*.

2. Default & Deregistration Procedure (MP, MDP, ENM, MC)

Please delete any rows where there are no particpant comments

Clause	Heading	Participant Comments
1.1	Purpose and Scope	Purpose sentence should state : This Default and Deregistration Procedure… rather than just This Default Procedure…

3. Exemption Procedure (Metering Installation Malfunctions)

Please delete any rows where there are no particpant comments

Clause	Heading	Participant Comments
	Full Document	No comments

4. MSATS Procedures: National Metering Identifier

Please delete any rows where there are no particpant comments

Clause	Heading	Participant Comments
14	ENERGY DIRECTION FLOWS	14.(c) Renumber next two points to be under (c) for clarity as they relate specifically to that statement. (c) For the purposes of MSATS, 'Net' *energy* is derived as: Net = Export - Import (i) Hence, the net *energy* for *generation* is negative (in a net quantity) and an End User's *energy* is positive (in a net quantity). (ii) For Accumulation Meter Datastreams, this means that the energy values for import (generation) must be negative.

5. Qualification Procedure

Clause	Heading	Participant Comments
	Full Document	No comments

6. Service Level Procedure – Embedded Network Manager

Please delete any rows where there are no particpant comments

Clause	Heading	Participant Comments
1	INTRODUCTION	Error in the footer on Version Release History and Contents pages (prior to the Introduction section.) 'Doc Ref: **Error! No text of specified style in document.'**
1.1	Purpose and Scope	Purpose sentence should include the words Embedded Network Manager in the following sentence to be consistent with the other documents instead of generic 'This Service Level Procedure (Procedure) is made in accordance with …' Eg. This Service Level Procedure – Embedded Network Manager (Procedure) is made in accordance with ..

7. Unmetered Load Guideline
