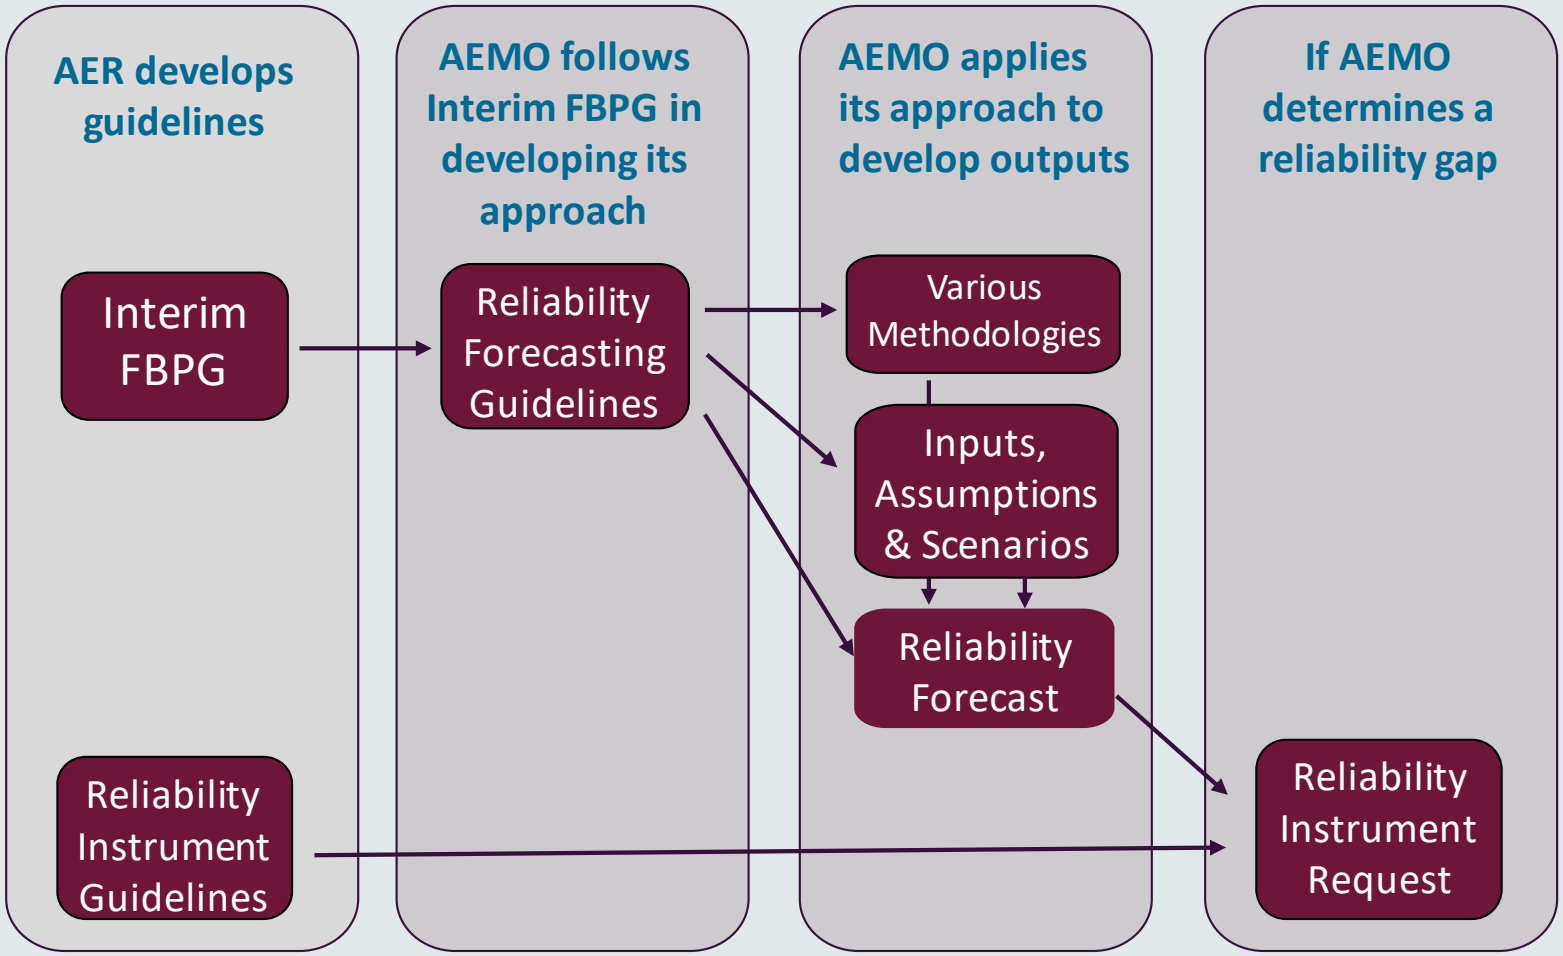
www.Sli.do #FRG

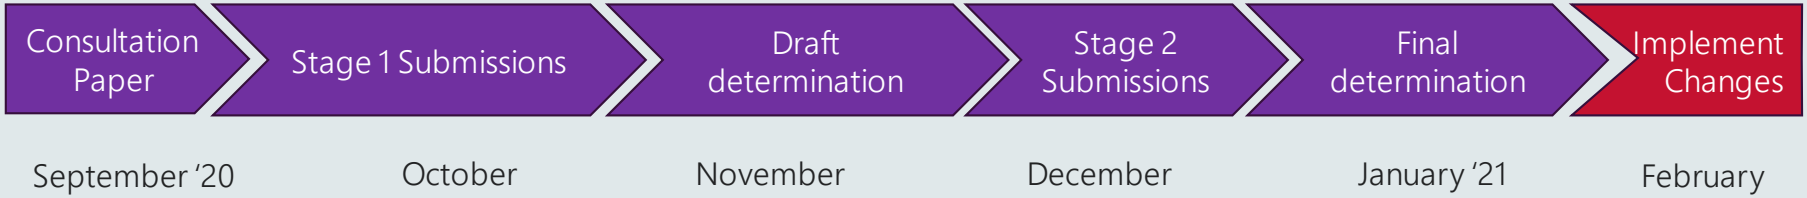
Background

- Reliability forecasts are a critical input to triggering obligations under the Retailer Reliability Obligation (RRO), introduced on 1 July 2019.
- AEMO developed the Interim reliability forecast guidelines that were published (after consultation) in December 2019
- These Interim Guidelines apply for the reliability forecast produced as part of AEMO's 2020 Electricity Statement of Opportunities (ESOO).
- **AEMO is required to publish the Final Reliability Forecast Guidelines by 28 February 2021 as per NER clause 11.116.4(c).**

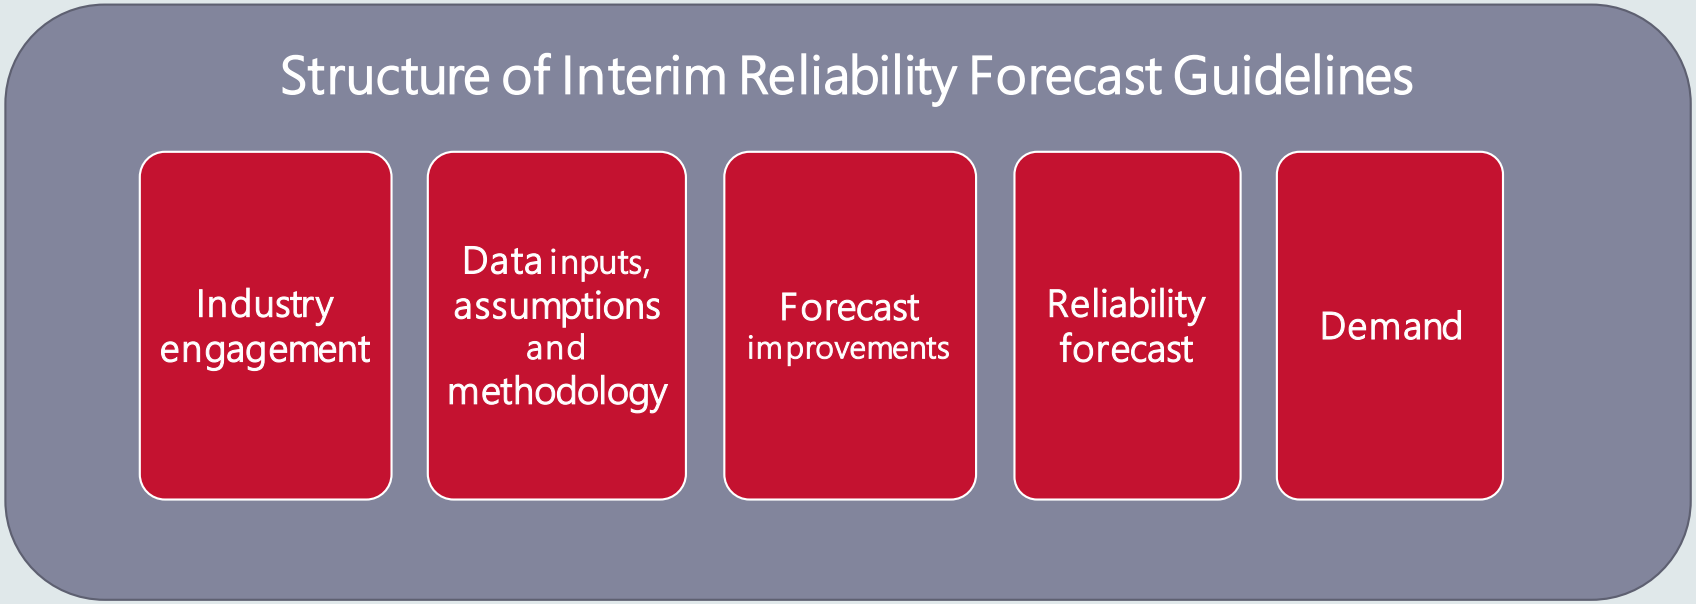
Where the guidelines fit in



Timeline for consultation



Potential focus areas



What areas would you like to see focus on?

AEMO
AUSTRALIAN ENERGY MARKET OPERATOR
