# Information Exchange Committee Meeting

Strategic Priorities 2019
Forward work program August 2019

# IEC strategic priorities 2019

| Strategic Priorities | Key Themes |
|---|---|
| 1. Examine opportunities for greater leveraging of the skills and knowledge of the IEC, recognising the value of the industry-AEMO collaboration that the group represents | • IEC meetings to include updates from AEMO on market reforms with a potential impact on B2B reforms<br>• Identify opportunities to leverage the IEC more broadly and earlier (for relevant B2B matters) as part of AEMO consultation processes |
| 2. Support innovation and change through earlier and improved visibility of the pipeline of changes to the B2B framework | • Identify mechanisms to improve the speed-to-market of B2B reforms – from problem definition to solution delivered<br>• Maintain a forward-looking program of work which takes into consideration known / likely B2B reforms<br>• Identify opportunities for better use/ availability of data for the sector, consumers and innovators |
| 3. Improve B2B system flexibility | • Look for the opportunities to improve B2B system flexibility to enable AEMO and industry to be more effective in responding to B2B changes and reduce the cost of implementing those changes<br>• Ensure that IT is not a barrier to entry but rather is a facilitator<br>• AEMO to consider improving its information sharing about the timing of system schema changes for its B2B system |

# IEC Strategic priorities 2019 (by member category)

| Representative IEC sector | Strategic priorities |
|---|---|
| DNSP Member | • Opportunity to leverage the IEC more broadly and earlier for relevant B2B matters. For example, AEMO's DER program |
| Metering Member | • Maturing the PoC framework to deliver improved benefits for the sector and consumers, including mechanisms / transactions to share greater information about metering installations<br>• Identifying mechanisms to improve the speed to market of B2B reforms – from problem definition to solution delivered |
| Retailer Member | • Better visibility of the pipeline of changes which impact B2B – earlier information from AEMO / AEMC<br>• Improve information sharing from AEMO about the timing of schema changes<br>• Improve system flexibility to minimise the impact of change (speed and cost), for example, LVI improvements |
| Consumer Member | • Opportunity to use the IEC as a consultative resource, recognising the value of an industry-collaborative approach that the IEC represents.<br>• Make sure IT is not a barrier to entry but is a facilitator (transactions necessary for transactive energy (better use of DER), CDR).<br>• Better use/ availability of data for consumers and innovators |

# IEC rolling forward plan 2019-20

| Proposed Meeting Details | Proposed content, decisions or outcomes to inform agenda |
|---|---|
| IEC Meeting 17<br>25 November 2019<br>AEMO Melbourne Office | • AEMC forward work program – rule changes with the potential to impact B2B including Customer Data Rights and embedded networks (proposal to establish a working group)<br>• Progress against Q3 and Q4 B2B procedural consultations<br>• IEC Election Procedures vote outcomes<br>• Life support update<br>• 2019 Annual Report<br>• Proposed 2020 program of work<br>• Proposed 2020 budget<br>• 2020 IEC meeting dates |
| *# IEC Member Election to be run in November 2019 #*<br><br>*# IEC Discretionary Members #* | • *IEC will be briefed in an out-of-session Circular providing details of the Election process for members.*<br>• *To be confirmed* |
| IEC Meeting 18<br>24 February 2020<br>AEMO Offices & Teleconference | • Finalisation of consultations from Q3 and Q4<br>• In-depth discussions on Customer Data Rights and embedded networks<br>• Election results (wrap-up) for member and discretionary member categories<br>• Final meeting for any outgoing members<br>• IEC Strategic Priorities 2020 and proposed program of work |
