**5 February 2019**

1. This Addendum is issued under the Call for Expressions of Interest – Western Victoria Transmission Network Project – Contestable Transmission Works (CEI) issued by Australian Energy Market Operator Limited (AEMO) on 18 January 2019.
2. AEMO confirms that condition D.20 of the CEI is aimed at preventing anti-competitive conduct. Accordingly, it is not necessary for Recipients to obtain AEMO's approval before discussing this opportunity with potential consortium members, sub-contractors, equipment suppliers, or consultants, unless those discussions are designed to, or might have the effect of, lessening competition in relation to the contestable portions of the Project or the supply to AEMO of the services contemplated by the CEI.
