Re: Submission to include the HUB.NOVA Luminaire into the National Electricity Load Tables for unmetered loads.

David,

At the request of the Ausgrid, we would like to have the following LED luminaires added to the National Electricity Market Load Tables.

Luminaire	Total System Power	External Label	Report Number
HUB.NOVA 14	14.5 W	L14	216115

To confirm all HUB.NOVA's for supply to unmetered applications in Australia will be externally stencilled in Accordance with AS/NZS 1158.6

HUB confirms the HUB.NOVA 14 is available with the following control options:

No PE Control

D2 PE Base

NEMA, 3 pin, 5 pin and 7pin Base

All control options are in accordance with AS1158, PE Cells to be supplied by others

Test report 216115 was tested without PE Control

Kind Regards

Mark West
