1 Operational Issues

This section of the report outlines any operational issues encountered by the GRMS or the operational team during the month which either impacted, or had the potential to impact the delivery of WA GRMS services.

1.1 GRMS Originating Issues

This section describes operational issues which originated from the GRMS and had a direct impact either on the WA market, CGI's service levels or AEMO's adherence to the Retail Market Procedures (RMP). There is one GRMS operational issues to report this month.

1.1.1 WA GRMS OUTAGE FRI 19TH MAY 2017 (IR-AEMO-0084)

Market Impact:

There was no Market impact as a result of the outage. All market reports were delivered on time.

SLA Impact:

Market System Availability was impacted by the outage of 63 minutes due to this incident.

The CGI communications team were implementing a change to the SAN switches as part of the WA GRMS Hardware refresh project. The second stage of the two stage change resulted in the overwriting of the SAN switch configuration at 3pm AEST resulting in the WA Production system processing coming to a halt. When the Communications team identified the incident, the overwritten configuration was replaced and normal operation of the WA Production GRMS resumed at 4:03pm AEST. There was an outage of 63 minutes.

1.2 Market Originating Issues

This section describes operational issues which originated from outside the bounds of the GRMS which caused subsequent market impact or required significant input from the CGI operational team to resolve. Market originating issues may also have had an impact on CGI's service levels and AEMO's adherence with the RMP although in most cases, CGI will claim concession from service failures resulting from issues described in this section.

There are no Market originating issues to report this month.

1.3 Operational Risks

Operational risks are situations which, if not managed appropriately may become operational issues which have the potential to impact CGI, AEMO or the WA market. Current risks which CGI are managing and of which AEMO should be aware are described below.

No new operational risks have been identified.

2 GRMS Scheduled / Unscheduled Events

2.1 Scheduled Events

The following table details all scheduled events that may have affected GRMS availability during the calendar month. Events were performed during agreed downtime periods and therefore were implemented with minimal impact to participants.

Scheduled events which have the potential to impact participants are planned to take place outside of WA business hours on a best endeavours basis or at a time agreed with participants. Times shown are EST. It should be noted that only those events which involve the ebXML or FTP gateways have an impact on the market from an availability perspective.

Name	Description	Date	Time	Mins	Ref
NSW GRMBS	Microsoft Security Patching	23-May-2017	19:30	180	CR/AEMO-N/0054
SA GRMS	Microsoft Security Patching	30-May-2017	19:30	180	CR/AEMO-S/0025
WA GRMS	Microsoft Security Patching	26-May-2017	17:00	180	CR/AEMO-W/0021

2.2 Unscheduled Events

The following table details unscheduled events for the calendar month. Outage minutes exclude time during agreed maintenance periods. It should be noted that only those events which involve the EbXML or FTP gateways have an impact on the market from an availability perspective.

Name	Description	Date	Time	Mins	Ref
WA	FRC Hub and FTP gateway	19-May-2017	15:00	63	IR-AEMO-0084

2.3 System Availability Summary

During the month, there were 31 days resulting in the following availability metrics as defined in the SOSA:

TPA (Total Possible Availability) = 37,200 minutes

(Based on 20hrs per day 03:00 until 23:00 each day)

GAPS (Intervals of unscheduled downtime) = 63 minutes

SAM (Scheduled & Agreed Maintenance) = 180 minutes

The SLA requires market system availability of 99.6%

The market system was available for a total of **37,137 minutes** once scheduled and agreed maintenance is excluded. This equates to an overall availability of **99.83%**
