

DISTRIBUTION LOSS FACTORS FOR THE 2010 / 2011 FINANCIAL YEAR

PREPARED BY: Electricity Metering and Settlements
PREPARED FOR: National Electricity Market
DOCUMENT NO: N/A
VERSION NO: 4
EFFECTIVE DATE: July 2010

Important Disclaimer

This document is made available to you on the following basis:

- (a) **Purpose** – This document has been prepared by the Australian Energy Market Operator Limited (**AEMO**) for the purpose of clause 3.6.3(i) of the National Electricity Rules (**Rules**).
- (b) **Supplementary Information** – This document might also contain information the publication of which is not required by the Rules. Such information is included for information purposes only, does not constitute legal or business advice, and should not be relied on as a substitute for obtaining detailed advice about the National Electricity Law, the Rules, or any other relevant laws, codes, rules, procedures or policies or any aspect of the national electricity market, or the electricity industry. While AEMO has used due care and skill in the production of this document, neither AEMO, nor any of its employees, agents and consultants make any representation or warranty as to the accuracy, reliability, completeness, currency or suitability for particular purposes of the information in this document.
- (c) **Limitation of Liability** – To the extent permitted by law, AEMO and its advisers, consultants and other contributors to this document (or their respective associated companies, businesses, partners, directors, officers or employees) shall not be liable for any errors, omissions, defects or misrepresentations in the information contained in this document or for any loss or damage suffered by persons who use or rely on this information (including by reason of negligence, negligent misstatement or otherwise). If any law prohibits the exclusion of such liability, AEMO's liability is limited, at AEMO's option, to the re-supply of the information, provided that this limitation is permitted by law and is fair and reasonable.

Rules Requirements

As specified in the National Electricity Rules, distribution loss factors:

- Notionally describe the average electrical energy losses for electricity transmitted on a distribution network between a distribution network connection point and a transmission network connection point or virtual transmission node for the financial year in which they apply;
- Will either be a site specific distribution loss factor, as defined in clause 3.6.3(b)(2)(i), or derived from the volume weighted average of the average electrical energy loss in the distribution network, as defined in clause 3.6.3(b)(2)(ii); and
- Are to be used in the settlement process as a notional adjustment to the electrical energy flowing at a distribution network connection point in a trading interval to determine the adjusted gross energy amount for that connection point in that trading interval, in accordance with clause 3.15.4.

Clause 3.6.3(i) requires that each year the Distribution Network Service Provider must determine the distribution loss factors to apply in the next financial year in accordance with clause 3.6.3(g) and provide these to AEMO for publication by 1 April. Before providing the distribution loss factors to AEMO for publication, the Distribution Network Service Provider must obtain the approval of the AER for the distribution loss factors it has determined for the next financial year.

Distribution Loss Factors for 2010/11

The Queensland DLFs for the 2010/11 financial year were approved by the AER and are tabulated in Appendix A.

The Victorian DLFs for the 2010/11 financial year were approved by the AER and are tabulated in Appendix B.

The NSW DLFs for the 2010/11 financial year were approved by the AER and are tabulated in Appendix C.

The Australian Capital Territory DLFs for the 2010/11 financial year were approved by the AER and are tabulated in Appendix D.

The South Australian DLFs for the 2010/11 financial year were approved by the AER and are tabulated in Appendix E.

The Tasmanian DLFs for the 2010/11 financial year were approved by the AER and are tabulated in Appendix F.

Appendix G contains a contact for the AER. Any questions regarding distribution connection points and DLFs should be referred to this contact.

Appendix A: Queensland Distribution Loss Factors for 2010/11

The AER has approved the following distribution loss factors for Queensland for the 2010/11 financial year.

Table A1: Energex Average Distribution Loss Factors

NETWORK LEVEL	DLF CODE	APPLIED IN 2009/10	TO APPLY IN 2010/11
110 kV connected	FSSS	1.0047	1.0058

	Long sub-transmission	MSAL	MHBL	MHCL	MLDL	MLEL

Notes:

- DLF- A is the distribution loss factor to be applied to a second tier customer or market customer connected to a sub-transmission line at 66 kV or 22 kV.
- DLF- B is the distribution loss factor to be applied to a second tier customer or market customer connected to the lower voltage side of a zone substation at 22 kV, 11 kV or 6.6 kV.
- DLF- C is the distribution loss factor to be applied to a second tier customer or market customer connected to a distribution line from a zone substation at voltage of 22 kV, 11 kV or 6.6 kV.
- DLF- D is the distribution loss factor to be applied to a second tier customer or market customer connected to the lower voltage terminals of a distribution transformer at 240/415 V
- DLF- E is the distribution loss factor to be applied to a second tier customer or market customer connected to a low voltage line at 240/415 V.
- Separate DLFs are also calculated for each DLF category A to E depending on whether the length of the sub-transmission line supplying the customer upstream of the customer's connection point is 'short' or 'long'.

A short sub-transmission line is defined as:

- a radial sub-transmission line where the route length of the line is less than 20 km, or

- a sub-transmission line in a loop where the total route length of all lines in the loop is less than 40 km.

All other sub-transmission lines are defined as 'long sub-transmission'

* These customers fell outside of the requirements for the allocation of a NMI specific DLF for the 2009/10 year but based on the 2008/09 billing data meet the requirements for a NMI specific DLF for 2010/11.

Due to technical reasons:

NMI NEEE000770 had to be replaced by a new NMI pair 4311061116 and 4311061119, effective 1 July 2010, 00.00h;

NMI NEE000771 had to be replaced by a new NMI pair 4311061121 and 4311061122, effective 1 July 2010, 00.00h

^ This customer satisfied the requirements for a NMI specific DLF for 2009/10 but based on the 2008/09 billing data was found to fall outside these requirements. A DLF code for General Use has been assigned appropriate for the voltage level of the supply point within the network.

Appendix F: Tasmania Distribution Loss Factors for 2010/11

The AER has approved the following distribution loss factors for Tasmania for the 2010/11 financial year.

Aurora Energy has grouped transmission connection sites into seven regions. The DLFs are grouped into each of these seven regions.

The transmission connection points that are associated with each region are detailed in tables as follows: Hobart (Table 1), Tamar (Table 2), East Coast (Table 3), North West (Table 4), Derwent (Table 5), Southern (Table 6), and West Coast (Table 7).

Table F1: Hobart Region DLFs

Distribution Network Level	Region	DLF Code	Section DLF (Including Non-Technical Losses)	Cumulative DLF (Including Non-Technical Losses)
Subtransmission Network	Hobart	PHST	1.0036	1.0036
Zone Substation	Hobart	PHZN	1.0018	1.0055
HV Distribution Network	Hobart	PHHV	1.0104	1.0159
Distribution Substation	Hobart	PHDS	1.0162	1.0324
LV Distribution Network	Hobart	PHLV	1.0313	1.0647

Table F2: Tamar Region (incorporating Launceston) DLFs

Distribution Network Level	Region	DLF Code	Section DLF (Including Non-Technical Losses)	Cumulative DLF (Including Non-Technical Losses)
Subtransmission Network	Tamar	PTST	1.0000	1.0000
Zone Substation	Tamar	PTZN	1.0000	1.0000
HV Distribution Network	Tamar	PTHV	1.0099	1.0099
Distribution Substation	Tamar	PTDS	1.0168	1.0269
LV Distribution Network	Tamar	PTLV	1.0313	1.0590

Table F3: East Coast Region DLFs

Distribution Network Level	Region	DLF Code	Section DLF (Including Non-Technical Losses)	Cumulative DLF (Including Non-Technical Losses)

Table F11: Southern Region Transmission Nodes

Zone Substation	Distribution Connection Voltage	TNI
Electrona	11kV	TEL2
Kermandie	11kV	TKE2
Kingston	11kV	TKI2
Knights Road	11kV	TKR2

Table F12: East Coast Region Transmission Nodes

Zone Substation	Distribution Connection Voltage	TNI
Avoca	22kV	TAV2
Derby	22kV	TDE2

Zone Substation	Distribution Connection Voltage	TNI
Scottsdale	22kV	TSD2
Sorell	22kV	TSO2
St Marys	22kV	TSM2
Triabunna	22kV	TTB2

Table F13: North West Region Transmission Nodes

Zone Substation	Distribution Connection Voltage	TNI
Burnie	22kV	TBU3
Devonport	22kV	TDP2
Emu Bay	11kV	TEB2
Palmerston	22kV	TPM3
Port Latta	22kV	TPL2
Railton	22kV	TRA2
Smithton	22kV	TST2
Ulverstone	22kV	TUL2
Wesley Vale	11kV	TWV2

Table F14: West Coast Region Transmission Nodes

Zone Substation	Distribution Connection Voltage	TNI
Newton	22kV	TNT2
Queenstown	22kV	TQT2
Rosebery	44kV	TRB2
Savage River	22kV	TSR2

Table F15: Derwent Region Transmission Nodes

Zone Substation	Distribution Connection Voltage	TNI
Arthurs Lake	22kV	TAL2
Bridgewater	11kV	TBW2
Derwent Bridge	22kV	TDB2
Meadowbank	22kV	TMB2
New Norfolk	22kV	TNN2
Tungatinah	22kV	TTU2
Waddamana	22kV	TWA2
Wayatinah	22kV	TWY2

Appendix G: Distribution Loss Factor - Contacts

Questions regarding the Distribution Loss Factors contained in this document should, in the first instance, be directed to the appropriate person listed below:
