1. Context

This template is to assist stakeholders in giving feedback about the changes detailed in the minor amendment proposal associated with ICF 074 and ICF 075. The proposals require changes to the MSATS Procedures: CATS Procedure and WIGS Procedure. Noting, AEMO will consolidate procedures in Q4 2023.

2. ICF 074

Questions	Participant Comments
Does your organisation agree with the proposed change to table 12-H of the CATS Procedure and 7-F of the WIGS Procedure?	Telstra has no comment on this proposal
Does your organisation have an alternative proposal for implementation?	

3. ICF 075

Questions	Participant Comments
Does your organisation agree with the proposed change to section 2.2 of the MSATS Procedures: CATS Procedure Principles and Obligations (“CATS Procedure”) to ensure that the Current FRMP updates the Last Consumer Change Date (“LCCD”) field.	<p>As the proponent Telstra Energy supports this proposal.</p> <p>Telstra Energy considers that the proposed changes reflect the agreement across the industry that AEMO will populate the LCCD field for change of retailer related to a move-in. The proposal does not remove the obligation of the Retailer (and not AEMO) to ensure the field is populated, but allows them to rely on the AEMO process unless and until they become aware that the process has not worked correctly.</p>

Metering Procedure Changes

	This minor change will avoid the need for Retailers to develop parallel processes which are very unlikely to be required if at all.
Does your organisation have an alternative proposal for implementation?
