Current version release details

Version	Effective date	Summary of changes
1.0	4 March 2024 November 2023	Creation of Guideline to support the integration of Exemptions into MSATS

Note: There is a full version history at the end of this document.

1. Introduction

1.1. Purpose and scope

This Guideline supplements the Metering NEM Exemption Procedures^s. The NER and the National Electricity Law prevail over this Guideline to the extent of any inconsistency.

1.2. Definitions and interpretation

The Retail Electricity Market Procedures – Glossary and Framework:

- (a) is incorporated into and forms part of this Guideline; and
- (b) should be read with this Guideline.

1.3. Related documents

Metering Exemption (Small Customer Metering Installation)	https://aemo.com.au/-/media/files/electricity/nem/retail_and_metering/metering-procedures/exemption-guideline---small-customer-metering-installation.pdf?la=en

2. DISCLAIMER

The intention of this guideline is to assist [MCsmetering co-ordinators](#) with the creation and management of metering exemptions.

- reflects the identification of exemption status.
- reflects the validation of NMIs within an exemption and their status
- reflect the ability to manage an exemption through the exemption life cycle.

3. Application Process

The only person who can apply for an exemption from the requirement in clause 7.8. [103](#)(a) or 7.8. [104](#) (a) of the NER is the Current MC.

3.1. Generally

~~The AEMOs interpretation of the Rules is a~~ [MCMetering Co-ordinator](#) is responsible for the registration and management and resolution of metering exemptions prior to the ~~agreed~~ exemption ~~expiry~~ date.

3.2. Responsibility

The [MCMetering Co-ordinator](#) must request an exemption within the Rule nominated period once they are aware that the issue cannot be resolved within the Rule requirement period.

The [MCMetering Co-ordinator](#) must ensure every endeavour to resolve the issue prior to requesting the metering exemption and must provide satisfactory evidence that this action has taken place.

AEMO has the responsibility of reviewing the evidence is satisfactory for an exemption to be granted and to either approve the exemption, reject the exemption, or request more information to support the exemption granting decision.

3.3. Supporting Information to support Application

The Current MC may apply for an exemption by creating an application within MSATS, once raised [and when required](#), the Current MC [must](#) provide [via email](#) supporting information identifying the allocated Exemption number [\(see email templates in Appendix B-\)](#). All supporting documentation must be sent to meter@aemo.com.au

4. Creation and Management of an Application

The following section provides instructions for the creation and management of an application within MSATS.

4.1. Exemption life cycle

Each exemption will run through a life cycle, from creation to the completion which also includes each associated NMI.

Each exemption may contain between 1 to 10075,000 NMIs that are of the same Exemption category, Exemption type and Nature of exemption. If any of these items change for any corresponding NMIs a second exemption may be created to record the different conditions.

A copy of the 'logic' life cycle is provided below:

Diagram 1 – Exemption 'logical' life cycle

The following sections will step through the exemption process within MSATS and include information to support the creation, management, and completion of an exemption.

4.2. Navigation to exemptions

To support the integration of **Metering Installation Exemptions** into MSATS a new menu path for exemptions is available via the MSATS Browser and the Markets Portal.

Diagram 2 – Exemptions menu path

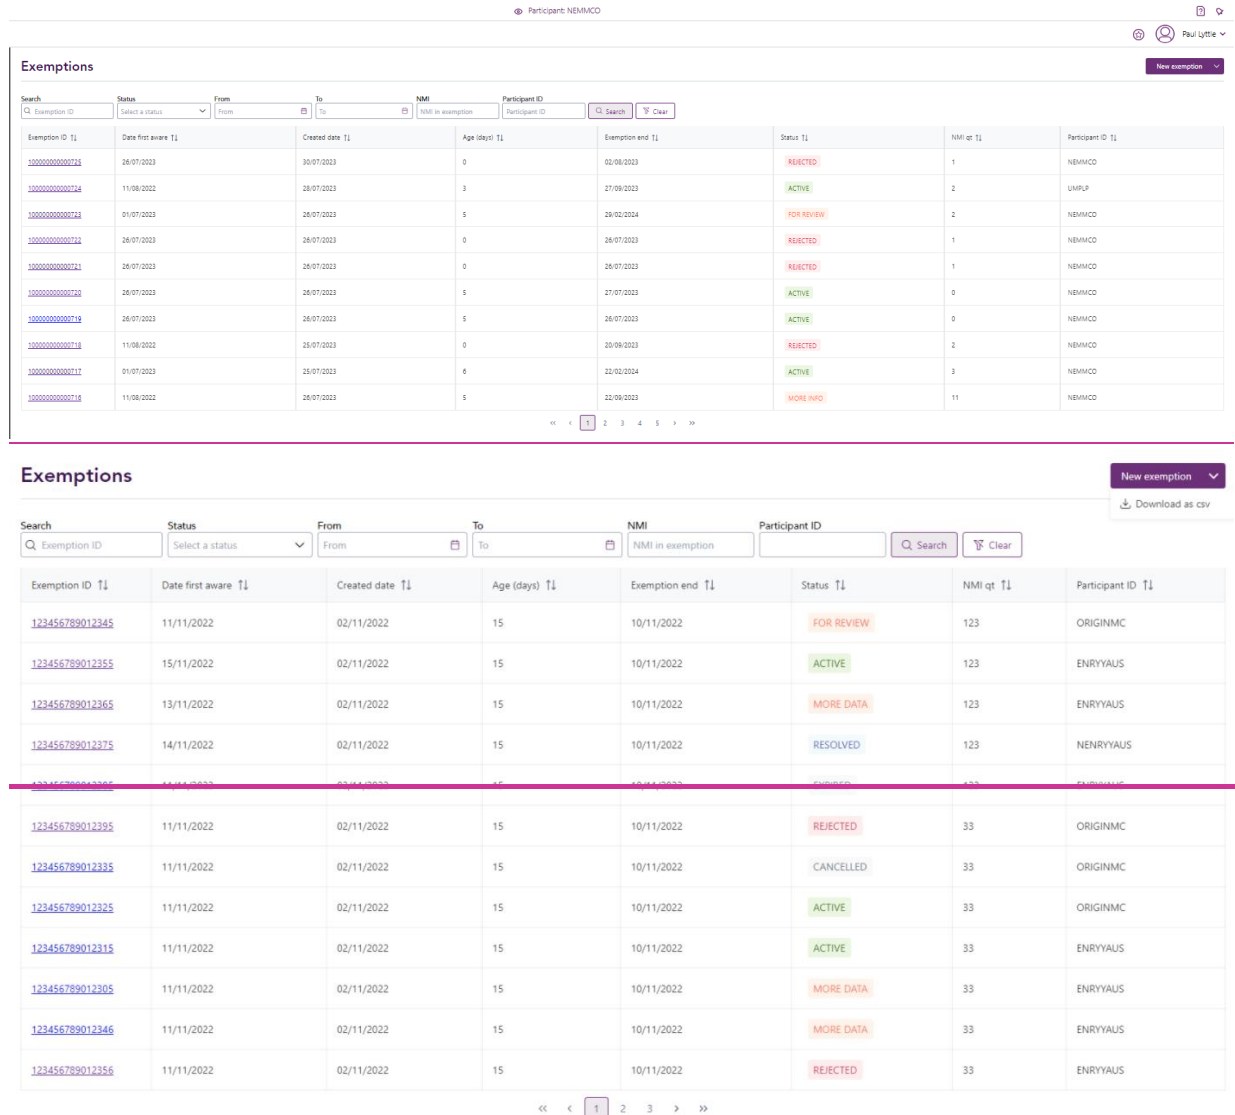

The New menu path consists of a Meter Exemptions directory with a link to the Exemptions function.

Note: participants have the ability to create, manage and complete exemptions via APIs. For API details refer to section [4.12](#)

4.3. Exemption list

Selection of the Exemptions link from the menu will direct the user to the Exemptions window.

This window is populated with existing exemptions for the registered participant ID. AEMO users have the ability to view all participant exemptions for monitoring and management purposes.

The screenshot displays the 'Exemptions' window for participant NEMMCO. It features a search bar at the top with filters for Exemption ID, Status, From, To, NMI, and Participant ID. Below the search bar is a table with the following columns: Exemption ID, Date first aware, Created date, Age (days), Exemption end, Status, NMI qt, and Participant ID. The table contains 12 rows of data with various statuses such as REJECTED, ACTIVE, FOR REVIEW, and MORE INFO. A pagination bar at the bottom shows page 1 of 5.

Diagram 3 – Exemption list

The Exemptions window includes the following features:

- Search parameter: to refine the list of exemptions being to be displayed by using the search parameters, including a calendar picker for each date field selection
 - Search (Exemption ID): will restrict the exemption id results to an exact match to the entered value.
 - Status: allows the user to select an exemption status and restricts the results to match the status selected
 - From: restricts the results where the exemption end date is greater than or equal to the entered value

- To: restricts the results where the exemption end date is less than or equal to the entered value
- NMI: restricts the results to display exemptions where the NMI value has been included
- Participant ID: restricts the results where the exemption has been raised by the entered participant id – case sensitive (used by AEMO)
- Sort arrows: to sort the returned values ~~the exemption list~~ into ascending and descending orders via each column
- Page option: to enable the user to page through the list of exemptions
- Drill down ability: will open the ~~on the~~ exemption ~~by on selecting~~ selection of the Exemption ID.
- ~~Create a new~~New exemption: enables the user to create a ~~by selecting the~~ New exemption ~~button~~ for the registered participant id
- ~~Download~~Download as CSV: allows the user to ~~r~~Retrieve ~~a~~ the results list of exemptions ~~by selecting the Download as csv secondary level button~~

The Exemption list window (or related API) ~~can~~ ~~becan~~ be used to identify lists of exemptions with a specific status.

Example: to identify a list of new exemptions that have moved to the 'MoreInfo' status, the Status should be set to MoreInfo and the creation range can be added to the Start and From dates (e.g. list of NMIs create between 24/07/2023 and 31/07/2023), the response will return the exemptions that fit the criteria. This response can also be downloaded as a CSV.

4.4. Creating a new exemption

Selection of the New exemption button on the Exemptions window will direct the user to the Create [Exemption exemption](#) window.

The create exemption window allows the participant to enter the exemption details and associated NMIs.

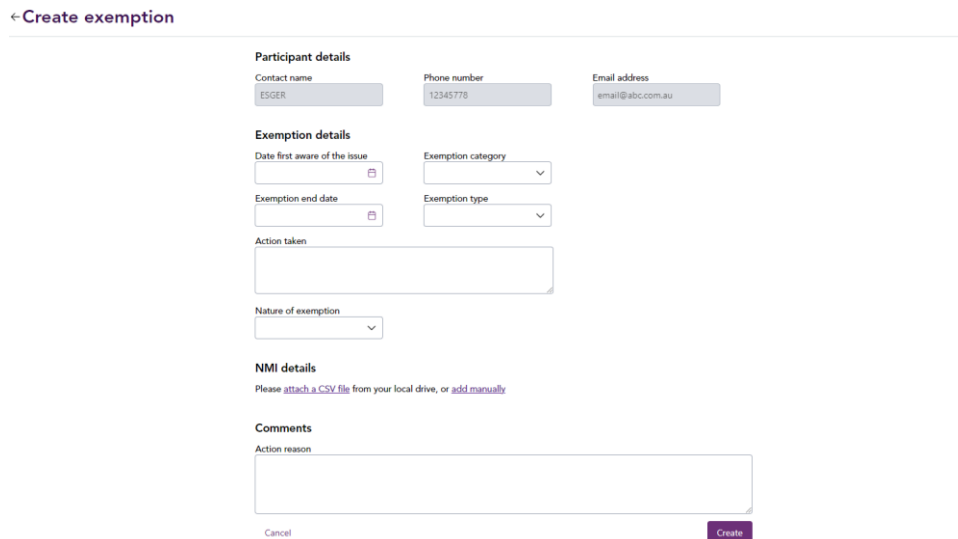

Diagram 4 – Create Exemption window

The Create exemptions window includes the following features:

- Participant details registered with AEMO for the participant ID⁴ will be automatically displayed, [these details can be maintained via participant contacts in MSATS](#).
- [Exemption category, exemption type and nature of exemption values are configurable by AEMO and will display different values depending on the exemption selections \(refer to Appendix A\)](#)
- [Action taken: identifies the actions that have been performed prior to request ionof the exemption.](#)
- [Population of NMI details is used to populated the list of NMIs related to the exemption – refer section 5.4.1](#)
- ~~Confirmation pop up window will display to validate the selected actions.~~
- [Comments, Action reason: this section is for the MC to provide notes on why they took the actionadditional details related to the exemption. An example, if the MC cancels an Exemption, they participant may want to add a notereason, or if the MC wants an extension, the theydetails should include the new requested expiry date, why they exemption needs an extension and the actions theythat have been taken to resolve the exemptions prior to the extension being granted.](#)

On completion of populating the exemption data, selection of the Create button will create the exemption and validate the associated NMI details. [Once created, and an acceptance message with the exemption ID will be generated.](#)

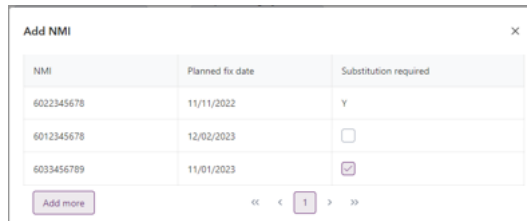

⁴ Updating of registered participant for a participant id can be sent to the meter@aemo.com.au email address

Note: Selection of the Cancel link will return the user to the Exemptions list window without saving any data changes.

4.4.1. Population of NMI Details

Two options have been provided for the online process to support the population of NMI details within an exemption:

1. Add manually: selection of the link will present the user with a pop-up input window

NMI	Planned fix date	Substitution required
6022345678	11/11/2022	Y
6012345678	12/02/2023	<input type="checkbox"/>
6033456789	11/01/2023	<input checked="" type="checkbox"/>

Diagram 5 – Add NMI pop-up window

Selecting the add more button will provide more fields to input additional NMI details.

Once the pop-up window exceeds its capacity a new page will be presented to the user.

2. Attach a CSV file: selection of the link will present the user with a pop-up window to select a file, please refer to section 4.11 For CSV format requirements

Diagram 6 – Upload file pop-up window

The uploaded CSV file will be displayed, ~~the~~ this file can be ~~deleted~~ deleted prior to the Exemption being saved, and a new file can be loaded.

Diagram 7 – Add NMI pop-up window

When recording a NMI the following information must be provided ~~is mandatory~~:

1. NMI
2. Planned fix date²: Date by when the NMI issue will be resolved this date must be prior to the exemption ~~expiry~~ end date and must provide a progression of correction over the exemption period.
3. Substitution Required³: Identifies if meter reads for the NMI will require substitution until the issue resolution and the MDP has been notified.

Once the exemption create button is selected the associated NMIs entered via the Add manual or Attach a CSV file processes will be validated, any NMIs that fail validation will be excluded from the exemption.

²Planned fix date must be supplied as per clause 7.8.10 (c) of the Rules

³Notification of metering installation malfunction must be completed within 1 business day as per NER clause 7.8.10 (d)

The following validations will reject the NMI during the creation process:

1. Any duplicate NMI values within the exemption list.
2. NMI does not exist in MSATS
3. NMI with a status of 'X' (extinct) or 'N' (non-market)
4. The requesting participant id is not the active ~~Metering Co-ordinator~~MC (RP) participant ID assigned to the NMI
5. NMI is included in another active exemption id.

4.4.2. Providing supporting information

While raising an exemption additional documentation may be required to support the exemption request⁴. This additional information will not be ~~loading~~ loaded into MSATS and must be sent to meter@aemo.com.au.

⁴ Exemption supporting information will be stored in an AEMO directory separate from MSATS

4.5. Reviewing an exemption

Once the participant has created an exemption, the exemption status will be set to a status of 'For Review'. AEMO is responsible for reviewing all exemptions with a 'For Review' status. AEMO is the only party who can make changes while the exemption status is "For Review"

While reviewing the exemption AEMO have 3 processing options:

1. Approve: ~~approval of the exemption will have been provided an exemption until the exemption expiry end date⁵. AEMO may update the exemption expiry date if they believe the date requested is not acceptable. If AEMO approves an exemption with conditions, the condition details will display in the exemption history section on the right hand side of the exemption detail window.~~
2. Request More info: AEMO may request supporting information and or apply conditions prior to Approving or Rejecting the exemption request.
3. Reject: where AEMO believe the exemption is not supported within the rules, AEMO will reject the exemption.

While the exemption is in the 'For Review' status, participants will be able to view exemption details but will not be able to change or update the exemption.

⁵ Participants will enter a requested exemption expiryend date, however AEMO may at their discretion update the expiryend date.

Set as: UMPLP Paul Lytle

Diagram 8 – Participant view when the exemption status is ‘For Review’

Once an exemption is approved, MSATS will perform additional automation. Depending on the Exemption category value the following processes⁶ will be performed⁶:

- Metering Installation Malfunction – once the exemption is approved MSATS will;
 - Raise a CR5101 change request for each NMI to populate the standing data fields of Meter Malfunction Exemption Number and Meter Malfunction Exemption Expiry Date.
 - Completion of the CR5101 will send a notification to all eligible participants as per the CATS Procedures.
 - Exemptions for a Type 4A category will not update the Meter Malfunction Exemption Number or Meter Malfunction Exemption Expiry Date field in the NMI Details table within MSATS.
- Type 4A – a new SDQ check will notify MC Metering Co-ordinators of exemptions that have been approved, rejected or sent for more info within the previous 7-14 days.

Details table within MSATS

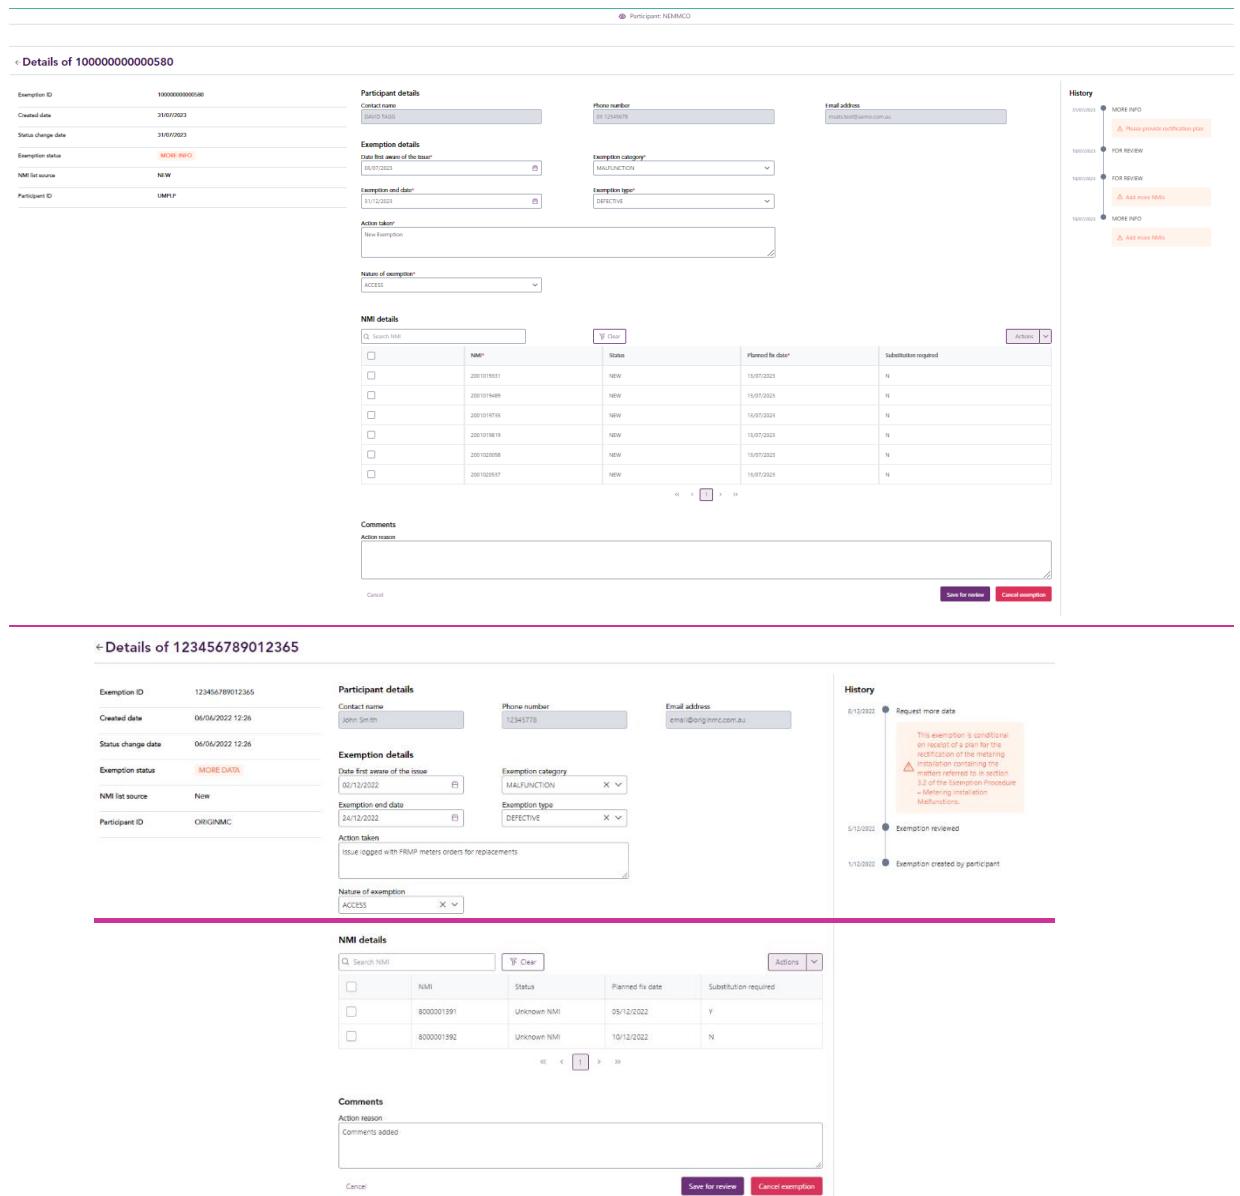

⁶ The Exemption category is a configurable field by AEMO and new values and actions may be included in the future.

- Malfunctions – a new SDQ check will notify MCs of exemptions that have been approved, rejected or sent for more info within the previous 14 days.

4.6. Providing more information

Where AEMO has requested more [information](#), the status will be updated to 'More [Data Info](#)'. Participants are required to:

- provide additional supporting documentation for the exemption⁷, or
- update the exemption details and/or NMI details.

The screenshot displays the 'Details of 10000000000580' exemption window. The status is 'MORE INFO'. The 'Exemption details' section shows 'Date first issue of the issue' as 05/07/2023 and 'Exemption category' as 'MALFUNCTION'. The 'NMI details' table lists several NMIs with their status and planned fix dates.

NMI	Status	Planned fix date	Substitution required
2001019511	NEW	15/07/2023	N
2001019489	NEW	15/07/2023	N
2001019716	NEW	15/07/2023	N
2001019819	NEW	15/07/2023	N
2001020008	NEW	15/07/2023	N
2001020517	NEW	15/07/2023	N

The 'History' panel on the right shows a sequence of events: 'MORE INFO', 'JOB REVIEW', 'JOB REVIEW', 'MORE INFO', and 'MORE INFO'. A red warning icon is present next to the first 'MORE INFO' entry.

Diagram 9 – Details window when the exemption status is 'More [Data Info](#)'

Once the updates have been completed and/or supporting documentation provided to AEMO (where required) the selection of the Save for review button will return the exemption to AEMO for review.

⁷ Additional information will not be load~~ed~~ing into MSATS and must be sent to meter@aemo.com.au

~~Alternatively~~Alternatively, the requesting participant has the option to cancel the exemption ~~be~~by selecting the Cancel exemption button. Selecting the button will set any NMIs registered in the exemption that have ~~not been completed resolved~~a status of active or new to cancelled. The cancellation of a NMI allows the NMI to be included in a new exemption if required.

Note: Selection of the Cancel link (bottom left of the window) will return the user to the Exemptions list window without saving any data changes.

4.6.1. Updating of NMI Details

A number of options are available to support the updating of NMIs within an exemption these include:

1. Online update of NMIs ~~via~~
 - a. Selecting the check box next to a NMI(s) and selecting the Remove NMI action. This option will set the NMI Status to remove-Removed for the checked NMI(s) ~~from the exemption~~
 - b. ~~selecting~~Selecting the check box next to a NMI(s), updating the Planned fix data and/or Substitute required checkbox, then selecting ~~ing~~ing the Change NMI details action. This option will update details against the selected NMI(s) only.

Once the action button is selected ~~for online updated~~ the action will be performed immediately and the NMI details will be updated to the saved exemption details.

2. Uploading of NMI list ~~via~~
 - a. Selecting the Upload NMI list action will enable additional NMIs to be included against the exemption request (only available prior to the exemption being approved).
 - b. Selecting the Upload NMI changes action will update the existing NMI details within the exemption.

Only a single CSV file can be loaded for an exemption via the ~~below~~ online upload process

Attach a CSV file: selection of the link will present the user with a pop-up window to select of file, please refer to section 4.11 for CSV format ~~requirements~~requirements.

Diagram 10 – Upload file pop-up window

The uploaded CSV file will be displayed, the file can be deleted and a new file can be loaded.

Diagram 11 – Add NMI pop-up window

Once the exemption Send for review button is selected the associated upload file will be validated, any NMIs that fail validation will be excluded from the exemption.

The following validations will reject the NMI during the creation process:

- a. Any duplicate NMI values within the exemption.
- b. NMI does not exist in MSATS
- c. NMI with a status of 'X' (extinct) or 'N' (non-market)
- d. The requesting participant id is not the active ~~Metering Co-ordinator~~ (RP) participant ID assigned to the NMI
- e. NMI is included in another active exemption ID [that is granted to the Current MC](#).

4.6.2. Downloading NMI List

To assist with the management of a large quantity of NMIs the user will be able to request a CSV list of NMIs for the exemption.

Selecting the NMI details action Download list will ~~generator~~ generate a CSV file in the participants download folder. The list will contain all NMIs, [current status and status message \(which includes the rejection reason if applicable\) for the exemption in the format described in section 4.11](#)

```
C,PRODUCTION,METER EXEMPTION NMI,NEMMCO,POWERCOR,2022/04/07,22:04:05,,,,,NEM,,  
I,MEN,NMI,STATUS,PLAN DATE,SUBSTITUTION REQ,STATUS MESSAGE

D,MEN,1234567891,REJECTED,2023/08/06,Y,Participant Not MC.  
C,END OF REPORT,5
```

4.7. Managing an exemption

Once AEMO has Approved the exemption the status will be updated to 'Active'. All details within the exemption (including NMI details) are stored and cannot be updated, except the Action Reason field.

Participants are now required to manage the exemption by:

- Actioning each of the NMIs, then
- Actioning the exemption

Participant: NEMMCO

- 8/12/2022 Rejected by AEMO ⊗ The exemption is rejected because the rectification plan is not provided according to the procedure.
- 5/12/2022 Exemption reviewed
- 1/12/2022 Exemption created by participant

Diagram 12 – Details window when the exemption status is ‘Active’

4.7.1. Actioning a NMI(s)

A number of options are available to support the updating of NMIs within an exemption these include:

1. Online actioning NMIs via
 - a. selecting the check box next to a NMI(s) and selecting the Resolve action. This option will set the NMI status to Resolved for the checked NMIs
 - b. selecting the check box next to a NMI(s), and selecting the Cancel NMI action. This option will set the NMI status to Cancelled for the checked NMIs.

Once the action button is selected ~~for online updated~~ the action will be performed immediately, and the NMI details will be updated to the saved exemption details.

2. Uploading of NMI list via
 - a. Selecting the Upload NMI status action will update the status for the existing NMI details within the exemption.

Only a single CSV file can be loaded for an exemption via the ~~below~~ online upload process

Attach a CSV file: selection of the link will present the user with a pop-up window to select of file, please refer to section 4.11 for CSV format ~~requirements~~requirements.

Diagram 13 – Upload file pop-up window

The uploaded CSV file will be displayed, the file can be deleted and a new file can be loaded.

Diagram 14 – Add NMI pop-up window

Once the exemption action button is selected the associated upload file will be processed against the associated NMIs.

Once updates to all NMI details have been completed, selection of the Save changes button will process the exemption changes [as per Diagram 14](#).

Alternatively, the requesting participant has other options to select from:

- Cancel Exemption: will cancel the exemption and set any NMI that has not been ~~completed-resolved~~ to cancelled⁸.
- Resolve: will resolve the exemptions and set any NMIs that ~~has-have~~ not been ~~completed-resolved or cancelled~~ to resolved.

⁸ Cancelling a NMI enables the NMI to be included in a new exemption.

- Extend: will send the exemption back for review, the participant should include details in the Action Reason field of when the extension is needed and a proposed new [expiryend](#) date for the exemption. The AEMO reviewer will update the [expiryend](#) date during the approval process.

4.7.2. Expiry of an exemption

Where an exemption reaches its [expiryend](#) date the exemption and the associated NMIs will automatically be set to expired [in the following using AEMO Batch processes](#).

AEMO will notify [MCs Metering Co-ordinators](#) up to [2144](#) days prior to an exemption expiry date that the exemption is due to expire. The notification will be included in [the a](#) standing data quality (SDQ) report.

Once an Exemption is set to expired no updates are allowed. AEMO will also notify the [MCMetering Co-ordinator](#) of exemptions that have expired via [the a](#) SDQ report.

4.7.3. Churn of [MCMetering Co-ordinator](#)

During the lifecycle of the exemption the [MCMetering Co-ordinator](#) may change. To support the churn of [MCs Metering Co-ordinators](#) a new SDQ check will identify exempt NMIs that have a different active NMI [MCMetering Co-ordinator](#) compared to the [MCMetering Co-ordinator](#) on the exemption, where this condition is identified the status of the NMI will be set to MC Churn against the exemption.

~~If the New MC for that metering installation requires AEMO to reissue the exemption, the New MC must create an application in MSATS within 5 business days of becoming the New MC to reissue the exemption and provide a statutory declaration that there are no circumstances warranting the expiry of the exemption.~~

~~If the New MC for that metering installation determines that an exemption is still required, the New MC must submit a new exemption application within five business days of becoming the New MC. Applications are to be submitted using the MSATS application process and the New MC must provide the supporting documentation.~~

4.7.4. Downloading NMI List

To assist with the management of a large quantity of NMIs the user will be able to request a CSV list of NMIs for the exemption.

Selecting the NMI details action Download list will generator a CSV file in the participants download folder. The list will contain all NMIs for the exemption in the format described in section [4.11](#).

4.8. Viewing closed exemptions

Once an exemption has been closed the exemption can be viewed but cannot be updated. There is no process to re-activate a closed exemption, in this circumstance a new exemption will need to be created. Exemptions can be closed for **by** any of the following reasons.

- Rejected: exemption application has been rejected
- Cancelled: participant has cancelled the exemption
- Resolved: participant has resolved the exemption
- Expired: exemption **expiryend** date has been reached.

Participant: NEMMCO

4.9. Exemption notifications

Letters and correspondence will not be sent for metering exemptions in this automated process. It is the participants responsibility to monitor and manage the exemption progress.

However new Standing Data Quality (SDQ) checks will be included into the weekly reporting to [MCs Metering Co-ordinators](#), The SDQ checks will be:

- **ME_EXPIRE_SOON**
 - Description: Identifies metering exemptions due to expire in the next [2144](#) calendar days
 - Header details: [QueryId](#), [Stat_Date](#), ParticipantID, RoleID, [Source](#), [Table](#), [ExemptionID](#), [ME_ID](#), [sdrSdr_keyKey_2](#), [sdrSdr_keyKey_3](#), [Exemption_Start_Date](#), [Exemption_End_Date](#), [Field](#), [ME_Status](#), Category, Type, Nature, NMI_Qt
- **ME_EXPIRED**
 - Description: identifies metering exemptions that have reached the [expiryend](#) date and have been updated to expired
 - Header details: [QueryId](#), [Stat_Date](#), ParticipantID, RoleID, [Source](#), [Table](#), [ExemptionID](#), [ME_ID](#), [sdrSdr_keyKey_2](#), [sdrSdr_keyKey_3](#), [Exemption_Start_Date](#), [Exemption_End_Date](#), [Field](#), [ME_Status](#), Category, Type, Nature, NMI_Qt
- **ME_MC_CHURN**
 - Description: NMI assigned to an Exemption has changed MC and is no longer exempt.
 - Header details: [QueryId](#), [Stat_Date](#), ParticipantID, RoleID, [Source](#), [Table](#), [NMI_ID](#), [ME_ID](#), [Sdr_Key_3](#), [Start_Date](#), [End_Date](#), [Field](#), [ME_Status](#), Category, Type, Nature, [Old_MC](#)
- **ME_T4A_REVIEW**
 - Notify the [MC Metering Co-ordinator](#) when an exemption with an Exemption category of Type 4A has been [updated to Approved](#), ~~or~~ [Rejected](#) [or MoreInfo](#).
 - [QueryId](#), [Stat_Date](#), [ParticipantID](#), [RoleID](#), [Source](#), [Table](#), [NMI_ID](#), [ME_ID](#), [Sdr_Key_2](#), [Sdr_Key_3](#), [Start_Date](#), [End_Date](#), [Field](#), [ME_Status](#), [Category](#), [Type](#), [Nature](#), [Old_MC](#), [NMI_Qt](#)
- **ME_MAL_REVIEW**
 - [Notify the MC when an exemption with an Exemption category of Malfunction has been updated to Approved, Rejected or MoreInfo.](#)
 - [QueryId](#), [Stat_Date](#), [ParticipantID](#), [RoleID](#), [Source](#), [Table](#), [ME_ID](#), [Sdr_Key_2](#), [Sdr_Key_3](#), [Start_Date](#), [End_Date](#), [Field](#), [ME_Status](#), [Category](#), [Type](#), [Nature](#), [NMI_Qt](#)

Upon approval of [a metering installation malfunction](#) ~~an~~ exemption, all participants who are entitled under the CATS Procedures will receive a Completion Notification when the CR5101 has completed. This notification will provide the [metering installation malfunction](#) exemption number and expiry date.

Upon resolution, ~~or~~ [cancellation](#), [or expiration](#) of a [metering installation malfunction](#) ~~an~~ exemption all participants who are entitled under the CATS Procedures will receive a Completion Notification when the CR5101 has completed. This notification will remove the [metering installation malfunction](#) exemption number and expiry date, ~~the exemption field names will be there but with no data as per~~ [standard xml format](#).

4.10. Transition of existing exemptions

To support the management of exemptions, AEMO will transition all metering exemptions into MSATS where the [expiryend](#) date of the exemption is greater than go live date. The transition will include all NMIs registered against the exemption at the time of registration.

It will be the responsibility of the participant to update any NMIs that have been actioned between the date of registration assigned to the exemption.

[Participants will receive all CR5101 notifications as per the MSATS CATS procedure at transition of existing exemptions.](#)

4.11. CSV formats

Where a user elects to load a list of NMIs via the MSATS windows the standard AEMO CSV data format standard⁹ must be used.

An example of the CSV file content is as follows:

```
C,PRODUCTION,METER_EXEMPTION_NMI,NEMMCO,POWERCOR,2022/04/07,22:04:05,,,,NEM,0,
I,MEN,ACTION,NMI,PLAN_DATE,SUBSTITUTION_REQ
D,MEN,NEW,1234567890,2023/08/06,Y
C,END OF REPORT,4
```

where the ACTION can be:

- NEW: insert record
- CANCEL: update meter exemption NMI, status to 'CANCELLED'
- REMOVE: update meter exemption NMI, status to 'REMOVED'
- RESOLVE: update meter exemption NMI, status to 'RESOLVED'
- UPDATE: update meter exemption NMI

Note: the NEW action is only able to be performed during the creation of an exemption or when the exemption is in a status of [MoreDataMoreInfo](#).

4.12. API Navigation

To assist participants with the automation of the exemption creation and management of metering exemptions, APIs will be published for participant use.

⁹ Refer [CSV Data Format https://portal.prod.nemnet.net.au/help/Content/CSVdataFormat/CSV_Format.htm](https://portal.prod.nemnet.net.au/help/Content/CSVdataFormat/CSV_Format.htm) for more information.

4.12.1. GET_METER_EXEMPTION_LIST

This API is called to get a list of Meter Exemptions.

Access to this API is controlled by URM entity WS_GET_METER_EXEMPTION_LIST

Method	GET
Gateway URI	NEMRetail/MeterExemption/exemptionList
Gateway Headers	Authorization: Basic userId:password – used to get Redis session ID (SSID) and insert X-ss-id header into native request.
Native URI	/msats/ws/getMeterExemptionList
Request Content	None
Error Content	HTML formatted reason for non-200 response code

Native Headers

Parameter Name	Mandatory	Description
<u>Accept</u>	<u>N</u>	<u>Identifies content types accepted by the client.</u> <u>Options:</u> <u>application/json</u> <u>text/csv</u> <u>Default is 'application/json'.</u>
X-initiatingParticipantID	Y	Identifies which participant the user is acting for. Only Meter Exemptions for this participant will be returned. Refer to the Set Participant browser function.
<u>X-market</u>	<u>Y</u>	<u>Identifies the market: "NEM"</u>
X-ss-id	Y	Identifies a Redis session for authorisation.
X-transactionID	N	Unique identifier for each request.Used for logging.
X-market	Y	Identifies the market: "NEM"
Accept	N	Identifies content types accepted by the client. Options: application/json text/csv Default is 'application/json'.

Request Query

Parameter Name	Mandatory	Description
status	N	When present, only list Meter Exemptions with the given status.
meterExemptionId	N	When present, only list the Meter Exemptions with that ID.
meterExemptionFromDate	N	When present, only list Meter Exemptions from the given date. Format YYYY-MM-DD
meterExemptionToDate	N	When present, only list Meter Exemptions up to the given date. Format YYYY-MM-DD
NMI	N	When present, only list Meter Exemptions for given NMI.
participantId	N	When present, only list Meter Exemptions for given participant ID. This is only supplied when it is a NEMMCO user and they have permission to perform search. For participant, if this parameter is supplied then it is ignored.

Response Code

Code	Description
200	Request processed successfully, list returned in JSON format.
400, 401, 403, 405, 429	Errors in headers or too many requests.
500	Request processing failed, reason for failure is returned.

Response Content

List of Meter Exemptions, identified by meterExemptionId.

Supports two formats: CSV and JSON.

CSV

If 'Accept' = 'text/csv' then response is in CSV format

```
C,PRODUCTION,METER_EXEMPTION,NEMMO,POWERCOR,2022/04/07,22:04:05,,,,NEM,,
I,MEL,METER_EXEMPTION_ID,EXEMPTION_DATE,CREATE_DATE,AGE,END_DATE,STATUS,NMI_QUANTITY,PARTICIPANTID
D,MEL,123456789012345,2022/07/12,2022/08/06,14,2023/01/12,FOR REVIEW,5000,ORIGINMC
C,END OF REPORT,4
```

JSON

If 'Accept' = 'application/json' then response is in JSON format:

```
{
  "transactionId": "12345-abcd-27",
  "data": {
    "meterExemptions": [
      {
        "meterExemptionId": "123456789012345",
        "exemptionDate": "2022-07-12",
        "createDate": "2022-08-06",
        "age": "14",
        "endDate": "2023-01-12",
        "status": "FOR REVIEW",
        "nmiQuantity": "5000",
        "participantId": "ORIGINMC"
      }
    ]
  }
}
```

4.12.2. GET_METER_EXEMPTION

This API which is called to get the following for the specified Meter Exemption:

- Participant Contact details
- Meter Exemption details
- Meter Exemption history
- Meter Exemption NMI list
 - If NMI specified then return only that NMI details.
 - If NMI not specified then
 - For CSV response, return the complete NMI list.
 - For JSON response, the maximum number of NMIs returned is defined by configuration, currently set to 1,000.

Access to this API is controlled by URM entity WS_GET_METER_EXEMPTION

Method	GET
Gateway URI	NEMRetail/MeterExemption/exemptionDetails
Gateway Headers	Authorization: Basic userId:password – used to get Redis session ID (SSID) and insert X-ss-id header into native request.
Native URI	/msats/ws/getMeterExemption
Request Content	None
Error Content	HTML formatted reason for non-200 response code

Native Headers

Parameter Name	Mandatory	Description
<u>Accept</u>	<u>N</u>	<u>Identifies content types accepted by the client.</u> <u>Options:</u> <ul style="list-style-type: none"> • <u>application/json</u> • <u>text/csv</u> <u>Default is 'application/json'.</u>
X-initiatingParticipantID	Y	Identifies which participant the user is acting for. Only Meter Exemptions for this participant will be returned. Refer to the Set Participant browser function.
<u>X-market</u>	<u>Y</u>	<u>Identifies the market: "NEM"</u>
X-ss-id	Y	Identifies a Redis session for authorisation.
X-transactionID	N	Unique identifier for each request. Used for logging.
X-market	Y	Identifies the market: "NEM"
Accept	N	Identifies content types accepted by the client. Options: <ul style="list-style-type: none"> • application/json • text/csv Default is 'application/json'.

Request Query

Parameter Name	Mandatory	Description
meterExemptionId	Y	Identifies the Meter Exemption to be retrieved. If participant is NEMMCO then can retrieve any Meter Exemption. If participant is not NEMMCO then can only retrieve a Meter Exemption for that participant.
NMI	N	Identifies the NMI to be retrieved. NMI must be part of Meter Exemption.

Response Code

Code	Description
200	Request processed successfully, response returned in requested format.
400, 401, 403, 405, 429	Errors in headers or too many requests.
500	Request processing failed, reason for failure is returned.

Response Content

Response content can be either:

CSV

If 'Accept' = 'text/csv' then response is in CSV format and contains:

- Meter Exemption NMI list identified by meterExemptionId

```
C,PRODUCTION,METER_EXEMPTION_NMI,NEMMCO,POWERCOR,2022/04/07,22:04:05,,,,NEM,,
I,MEN,NMI,STATUS,PLAN_DATE,SUBSTITUTION_REQ,STATUS_MESSAGE
I,MEN,NMI,START_DATE,END_DATE,STATUS,PLAN_DATE,SUBSTITUTION_REQ
D,MEN,1234567890,ACTIVE,2023/08/06,Y,XYZ
D,MEN,1234567890,2022/08/06,2022/09/06,ACTIVE,2023/08/06,Y
C,END OF REPORT,4
```

JSON

If 'Accept' = 'application/json' or not specified then response is in default JSON format and contains:

- Participant Contact details identified by participantId
- Meter Exemption details identified by meterExemptionId
- Meter Exemption history identified by meterExemptionId
- Meter Exemption NMI list identified by meterExemptionId and NMI if supplied.

```
{
  "transactionId": "12345-abcd-27",
  "data": {
    "participantContact": {
      {
        "contactName": "John Smith",

  }
  }
  ..}
  1
}
}

```

Request Query Parameters

- Validation

- o meterExemptionId must be a valid number.
- o NMI must be alphanumeric

4.12.3. SUBMIT METER EXEMPTION

This API is called to submit a Meter Exemption payload and receive a message acknowledgment.

For NMI list payload either CSV or JSON, the maximum number of NMIs allowed is defined by configuration, currently set to 75,000.

Access to this API is controlled by URM entity WS_SUBMIT_METER_EXEMPTION

Method	Post
Gateway URI	NEMRetail/MeterExemption/submission
Gateway Headers	Authorization: Basic userId:password – used to get Redis session ID (SSID) and insert X-ss-id header into native request.
Native URI	/msats/ws/submitMeterExemption
Native Headers	See below
Request Query Parameters	See below
Request Content	See below
Response Codes	See below
Response Content	None
Error Content	HTML formatted reason for non-200 response code

Native Headers

Parameter Name	Mandatory	Description
X-initiatingParticipantID	Y	Identifies which participant the user is acting for. Only Meter Exemptions for this participant will be returned. Refer to the Set Participant browser function.
X-market	Y	Identifies the market: "NEM"
X-ss-id	Y	Identifies a Redis session for authorisation.
X-transactionID	N	Unique identifier for each request.Used for logging.

Request Query Parameters

Parameter Name	Mandatory	Description
action	Y	
meterExemptionId	N	When presents, identifies the Meter Exemption to be updated. If participant is NEMMCO then can update any meter exemption. If participant is not NEMMCO then can only update a meter exemption for that participant.

Request Content

Multipart.

First part: Meter Exemption - JSON

```
{
  "transactionId": "12345-abcd-27",
  "data":
```

```

{
  "meterExemption":
  {
    "exemptionDate": "2022-08-12",
    "endDate": "2022-09-06",
    "exemptionCategory": "MALFUNCTION"
    "exemptionType": "DEFECTIVE"
    "exemptionNature": "ACCESS"
    "actionTaken": "Issue logged with Telstra. Fix ETA 13/10/2022"
    "actionReason": "Checked communications"
  }
}

```

Second part: NMI list – CSV or JSON

CSV

```

C,PRODUCTION,METER_EXEMPTION_NMI,NEMMO,POWERCOR,NEMMCO,2022/04/07,22:04:05,,,,NEM,0
I,MEN,ACTION,NMI,PLAN_DATE,SUBSTITUTION_REQ
D,MEN,NEW,1234567890,2023/08/06,Y
C,END OF REPORT,4

```

JSON

```

{
  "transactionId": "12345-abcd-27",
  "data":
  {
    "meterExemptionNMIs":
    ←
    "meterExemptionNMI":
    [
      {
        "action": "NEW"
        "NMI": "1234567890",
        "planDate": "2022-08-06",
        "substitutionReq": "Y"
      }
    ]
    →
  }
}

```

where ACTION can be:

- NEW: insert record
- CANCEL: update meter exemption NMI, status to 'CANCELLED'

- REMOVE: update meter exemption NMI, status to 'REMOVED'
- RESOLVE: update meter exemption NMI, status to 'RESOLVED'
- UPDATE: update meter exemption NM

Request Query Parameters

- Mandatory parameters
 - Check following parameters are supplied and if not then reject request.
 - action
- Validation
 - action must be 'NEW', 'APPROVE', 'CANCEL', 'EXTEND', 'MOREINFO', 'REJECT', 'RESOLVE', 'REVIEW' or 'UPDATE'.
 - If action = 'APPROVE', 'MOREINFO' or 'REJECT' then X-initiatingParticipantID must be 'NEMMCO'.
 - If action = 'NEW' then meterExemptionId should not be supplied.
 - If action = 'APPROVE', 'CANCEL', 'EXTEND', 'MOREINFO', 'REJECT', 'RESOLVE', 'REVIEW' or 'UPDATE' then meterExemptionId is mandatory.
 - meterExemptionId must be a valid number.

Payload

- Mandatory
 - If action = 'NEW' or 'REVIEW' then payload must be supplied both
 - first part: Meter Exemption – JSON and
 - second part: NMI list – CSV or JSON
 - If action = 'UPDATE', then payload must be supplied either
 - first part: Meter Exemption – JSON or
 - second part: NMI list – CSV or JSON or
 - both
 - If action = 'APPROVE', 'MOREINFO' or 'REJECT' then payload may be supplied only
 - first part: Meter Exemption – JSON
 - If action = 'CANCEL', 'EXTEND' or 'RESOLVE' then payload may be supplied
 - first part: Meter Exemption – JSON or
 - second part: NMI list – CSV or JSON or
 - both
- Validation
 - First part: Meter Exemption – JSON
 - If action = 'NEW'
 - exemptionDate is mandatory, must be in date format 'YYYY/MM/DD' and cannot be a future date (must be today or date in the past).
 - endDate is mandatory, must in date format 'YYYY/MM/DD' and cannot be a date in the past (must be today or date in the future).

- exemptionCategory is mandatory and must one of allowed codes.
 - exemptionType is mandatory and must one of allowed codes.
 - exemptionNature is mandatory and must one of allowed codes.
 - actionTaken is mandatory and must be only 1500 characters long.
 - actionReason is optional and must be only 1500 characters long.
- Note: exemption category/type/nature are interconnected. Only certain combinations of category/type/nature are valid.
- If action = 'APPROVE', 'MOREINFO' or 'REJECT'
 - endDate is optional and if supplied must not be blank, must be in date format 'YYYY/MM/DD' and cannot be a date in the past (must be today or date in the future).
 - conditions is optional and if supplied must be only 1500 characters long.
 - No other meter exemption details are allowed.
 - If action = 'CANCEL' or 'REVIEW'
 - exemptionDate is optional and if supplied must not be blank, must in date format 'YYYY/MM/DD' and cannot be a future date (must be today or date in the past).
 - endDate is optional and if supplied must not be blank, must in date format 'YYYY/MM/DD' and cannot be a date in the past (must be today or date in the future).
 - exemptionCategory is optional and if supplied must not be blank must one of allowed codes.
 - exemptionType is optional and if supplied must not be blank must one of allowed codes.
 - exemptionNature is optional and if supplied must not be blank and must one of allowed codes.
 - actionTaken is optional and if supplied must not be blank and must be only 1500 characters long.
 - actionReason is optional and if supplied be only 1500 characters long.
 - No other meter exemption details are allowed.
 - If action = 'EXTEND' or 'RESOLVE'
 - actionTaken is optional and if supplied must be only 1500 characters long.
 - No other meter exemption details are allowed.
 - If action = 'UPDATE'
 - If X-initiatingParticipantID = 'NEMMCO'
 - endDate is optional and if supplied must not be blank, must in date format 'YYYY/MM/DD' and cannot be a date in the past (must be today or date in the future).
 - conditions is optional and if supplied must be only 1500 characters long.
 - actionTaken is optional and if supplied must not be blank and must be only 1500 characters long.
 - No other meter exemption details are allowed.

- Second part: NMI List
 - CSV
 - Control records
 - First line validation
 - Must be the header 'C' Record.
 - Must match this format and contain this information:
*C,system,report id,from,to,payload creation date,
payload creation time,,,market,payload id*
 - System is mandatory and must match either uppercase 'TEST', 'PREPROD' or 'PROD'.
 - Report Id is mandatory and must be uppercase 'METER_EXEMPTION_NMI'.
 - From Participant Id 'from' is mandatory and must match 'X-initiatingParticipantID'.
 - To Participant Id 'to' is mandatory and must be uppercase 'NEMMCO'.
 - Payload Creation Date is mandatory and must in date format 'YYYY/MM/DD'.
 - Payload Creation Time is mandatory and must in time format 'HH:MM:SS'.
 - Market is mandatory and must be uppercase 'NEM'.
 - Payload Id is mandatory and must not be more than 50 characters long.
 - There is no validation on the contents.
 - AEMO suggest defaulting the value to 0.
 - Last line validation
 - Must be the 'End of Report' 'C' Record.
 - Must match this format and contain this information:
C,end of report indicator,row count
 - End of Report Indicator is mandatory and must be uppercase 'END OF REPORT'.
 - Row Count is mandatory and must match total rows in the CSV Payload.
 - Row Count must not be more than configurable limit, currently set to 75,000.
 - CSV and JSON
 - Number of NMIs must not be more than configurable limit, currently set to 75,000.
 - action is mandatory and must be 'NEW', 'CANCEL', 'REMOVE', 'RESOLVE' or 'UPDATE'.
 - NMI
 - Mandatory.
 - Must be alphanumeric.
 - Must be only 10 characters long.
 - Must be unique on NMI list.

Done in backend processing

- If action = 'NEW'
 - Meter exemption action must be 'NEW' or 'REVIEW'.
 - planDate is mandatory and must in date format 'YYYY/MM/DD'.
 - substitutionReq is mandatory and must either 'Y' or 'N'.
- If action = 'CANCEL', 'REMOVE', 'RESOLVE' or 'UPDATE'.
 - Meter exemption action cannot be 'APPROVE', 'MOREINFO' or 'REJECT'.
 - planDate is optional and must in date format 'YYYY/MM/DD'.
 - substitutionReq is optional and must either 'Y' or 'N'.

Response Codes

Code	Description
200	Request processed successfully, list returned in JSON format.
400, 401, 403, 405, 429	Errors in headers or too many requests.
500	Request processing failed, reason for failure is returned.

5. Appendix A

5.1. Exemption Fields Values

Below is a list of values that will be configured by AEMO for the meter malfunction-exemption process.

Please note: these field values are configurable in MSATS and may change over-time

5.1.1. Exemption category codes

<u>CODE TYPE</u>	<u>CODE (in the tables)</u>	<u>DESCRIPTION</u>
<u>EXEMPTION_CATEGORY</u>	<u>MALFUNCTION</u>	<u>METERING EXEMPTION MALFUCTION</u>
<u>EXEMPTION_CATEGORY</u>	<u>TYPE4A</u>	<u>TYPE 4A (NO REMOTE COMMUNICATION)</u>

5.1.2. Exemption type codes

<u>CODE TYPE</u>	<u>CODE (in the tables)</u>	<u>PARENT CATEGORY</u>	<u>DESCRIPTION</u>
<u>EXEMPTION_TYPE</u>	<u>DEFECTIVE</u>	<u>MALFUNCTION</u>	<u>DEFECTIVE / FAULTY METERING EQUIPMENT</u>
<u>EXEMPTION_TYPE</u>	<u>FAMILY</u>	<u>MALFUNCTION</u>	<u>METER FAMILY FAILURE</u>
<u>EXEMPTION_TYPE</u>	<u>SHARED</u>	<u>MALFUNCTION</u>	<u>SHARED FUSE (SHARED SUPPLY)</u>
<u>EXEMPTION_TYPE</u>	<u>NOPUBNWK</u>	<u>TYPE4A</u>	<u>NO PUBLIC TELECOMS NETWORK</u>
<u>EXEMPTION_TYPE</u>	<u>NOALTNWK</u>	<u>TYPE4A</u>	<u>NO ALTERNATIVE TELECOMS NETWORK</u>
<u>EXEMPTION_TYPE</u>	<u>ENVIRON</u>	<u>TYPE4A</u>	<u>PHYSICAL OR ENVIRONMENTAL CONDITIONS PREVENTING REMOTE COMMS</u>

5.1.3. Nature of Exemption codes

<u>CODE TYPE</u>	<u>CODE (in the tables)</u>	<u>PARENT TYPE</u>	<u>DESCRIPTION</u>
<u>EXEMPTION_NATURE</u>	<u>ACCESS</u>	<u>DEFECTIVE</u>	<u>ACCESS ISSUE</u>
<u>EXEMPTION_NATURE</u>	<u>SAFETY</u>	<u>DEFECTIVE</u>	<u>SAFETY ISSUE</u>
<u>EXEMPTION_NATURE</u>	<u>TECHNICAL</u>	<u>DEFECTIVE</u>	<u>SITE TECHNICAL ISSUE</u>
<u>EXEMPTION_NATURE</u>	<u>CUSTOMER</u>	<u>DEFECTIVE</u>	<u>CUSTOMER WORK/UPGRADE REQUIRED</u>

<u>CODE TYPE</u>	<u>CODE</u> (in the tables)	<u>PARENT TYPE</u>	<u>DESCRIPTION</u>
<u>EXEMPTION NATURE</u>	<u>ACCESS</u>	<u>FAMILY</u>	<u>ACCESS ISSUE</u>
<u>EXEMPTION NATURE</u>	<u>SAFETY</u>	<u>FAMILY</u>	<u>SAFETY ISSUE</u>
<u>EXEMPTION NATURE</u>	<u>TECHNICAL</u>	<u>FAMILY</u>	<u>SITE TECHNICAL ISSUE</u>
<u>EXEMPTION NATURE</u>	<u>CUSTOMER</u>	<u>FAMILY</u>	<u>CUSTOMER WORK/UPGRADE REQUIRED</u>
<u>EXEMPTION NATURE</u>	<u>ACCESS</u>	<u>SHARED</u>	<u>ACCESS ISSUE</u>
<u>EXEMPTION NATURE</u>	<u>SAFETY</u>	<u>SHARED</u>	<u>SAFETY ISSUE</u>
<u>EXEMPTION NATURE</u>	<u>TECHNICAL</u>	<u>SHARED</u>	<u>SITE TECHNICAL ISSUE</u>
<u>EXEMPTION NATURE</u>	<u>CUSTOMER</u>	<u>SHARED</u>	<u>CUSTOMER WORK/UPGRADE REQUIRED</u>
<u>EXEMPTION NATURE</u>	<u>ACCESS</u>	<u>NOPUBNWK</u>	<u>ACCESS ISSUE</u>
<u>EXEMPTION NATURE</u>	<u>TECHNICAL</u>	<u>NOPUBNWK</u>	<u>SITE TECHNICAL ISSUE</u>
<u>EXEMPTION NATURE</u>	<u>ADMIN</u>	<u>NOPUBNWK</u>	<u>MC ADMIN ISSUE</u>
<u>EXEMPTION NATURE</u>	<u>ACCESS</u>	<u>NOALTNWK</u>	<u>ACCESS ISSUE</u>
<u>EXEMPTION NATURE</u>	<u>TECHNICAL</u>	<u>NOALTNWK</u>	<u>SITE TECHNICAL ISSUE</u>
<u>EXEMPTION NATURE</u>	<u>CUSTOMER</u>	<u>NOALTNWK</u>	<u>CUSTOMER WORK/UPGRADE REQUIRED</u>
<u>EXEMPTION NATURE</u>	<u>ADMIN</u>	<u>NOALTNWK</u>	<u>MC ADMIN ISSUE</u>
<u>EXEMPTION NATURE</u>	<u>ACCESS</u>	<u>ENVIRON</u>	<u>ACCESS ISSUE</u>
<u>EXEMPTION NATURE</u>	<u>SAFETY</u>	<u>ENVIRON</u>	<u>SAFETY ISSUE</u>
<u>EXEMPTION NATURE</u>	<u>TECHNICAL</u>	<u>ENVIRON</u>	<u>SITE TECHNICAL ISSUE</u>
<u>EXEMPTION NATURE</u>	<u>CUSTOMER</u>	<u>ENVIRON</u>	<u>CUSTOMER WORK/UPGRADE REQUIRED</u>
<u>EXEMPTION NATURE</u>	<u>ADMIN</u>	<u>ENVIRON</u>	<u>MC ADMIN ISSUE</u>

5.1.4. Exemption Status codes

<u>CODE TYPE</u>	<u>CODE</u> (in the tables)	<u>DISPLAYDESCRIPTION</u>
<u>EXEMPTION STATUS</u>	<u>NEW</u>	<u>NEW</u>
<u>EXEMPTION STATUS</u>	<u>ACTIVE</u>	<u>ACTIVE</u>

<u>CODE TYPE</u>	<u>CODE (in the tables)</u>	<u>DISPLAY DESCRIPTION</u>
<u>EXEMPTION STATUS</u>	<u>REVIEW</u>	<u>FOR REVIEW</u>
<u>EXEMPTION STATUS</u>	<u>MOREINFO</u>	<u>MORE INFO</u>
<u>EXEMPTION STATUS</u>	<u>CANCELLED</u>	<u>CANCELLED</u>
<u>EXEMPTION STATUS</u>	<u>RESOLVED</u>	<u>RESOLVED</u>
<u>EXEMPTION STATUS</u>	<u>EXPIRED</u>	<u>EXPIRED</u>
<u>EXEMPTION STATUS</u>	<u>REJECTED</u>	<u>REJECTED</u>

5.1.5. Exemption NMI Status codes

<u>CODE TYPE</u>	<u>CODE (in the tables)</u>	<u>DISPLAY DESCRIPTION</u>
<u>NMI_ME_STATUS</u>	<u>NEW</u>	<u>NEW</u>
<u>NMI_ME_STATUS</u>	<u>ACTIVE</u>	<u>ACTIVE</u>
<u>NMI_ME_STATUS</u>	<u>REJECTED</u>	<u>REJECTED</u>
<u>NMI_ME_STATUS</u>	<u>CANCELLED</u>	<u>CANCELLED</u>
<u>NMI_ME_STATUS</u>	<u>RESOLVED</u>	<u>RESOLVED</u>
<u>NMI_ME_STATUS</u>	<u>REMOVED</u>	<u>REMOVED</u>
<u>NMI_ME_STATUS</u>	<u>MCCHURN</u>	<u>MC CHURN</u>
<u>NMI_ME_STATUS</u>	<u>EXPIRED</u>	<u>EXPIRED</u>
