Andrei Tchoub	Alinta Energy
Peter Gramp	Alinta Energy
Jaynedra Weerawardana	Insight Power
Tim Larby	Hydro Tasmania
Vidhya Uthaman	Infigen Energy
Sangeeta Pai	AEMO
Phil Hayes	AEMO
Suman Nerella	AEMO
David Niven	AEMO
Deborah Armenante	AEMO
James Dikha	AEMO
Jeff Plant	AEMO
Deep Juneja	AEMO

1. Clarity was asked for regarding the versions of the discontinued files in the P5MIN CSV reports. Deborah Armenante advised the versions are correct and we will make improvements to the table labels to convey the information more clearly. Currently, in the Discontinued Files table the CSV report type column is the current Legacy file that will be discontinued. The Replaced by column is the New Legacy file.
2. Participants advised they did not receive Gas Bulletin Board communications. AEMO has investigated the distribution lists the Support Hub used to publish the communications and will ensure this is rectified for next documentation release. The following communications are attached:

- a. AEMO Help Desk Bulletin No. 2057: Meeting for the Gas Release September 2018
- b. AEMO Help Desk Bulletin No. 2060: Meeting for the Gas Release September 2018 - Update & reminder
- c. AEMO Help Desk Bulletin No. 2067: Gas Bulletin Board Data Model scripts release update
- d. AEMO Help Desk Bulletin No. 2070: GasBB - Data Model scripts, FAQ and Tech Spec and Release Schedule
- e. Gas Bulletin Board Gas Data Model 2.0 from previous Gas Data Model versions - SET GBB DATA MODEL TABLES TO ACTIVE

We also publish the Release Schedules, Technical Specifications, and Release FAQs to the following areas on AEMO's website, under Release Schedules:

- Electricity: <http://aemo.com.au/Electricity/IT-Systems/IT-change>
 - Gas: <http://aemo.com.au/Gas/IT-systems-and-change/IT-change>
3. Gas BB Data Model subscription changes were not communicated and why did this happen? Phil Hayes advised that due to the complete remodelling of the GBB Data Model it wasn't possible to support Legacy report versions. A defect was found in the pre-production script provided to participants and this was corrected in the production version of the GBB Data Model scripts.
 4. Participants asked if they can check the feedback on their Support Hub tickets because they are not happy with the responses they receive; they are too short and don't provide enough information. Suman Nerella advised that improvements will be discussed with the Support Hub.
 5. Participants requested that future MSUG meetings are not held at the same time as the 5-Min Settlements meetings. Suman Nerella advised AEMO will be more attentive to this in the future. Next MSUG is tentatively planned for 17 Jan 2019.
