To whom it may concern:

**Sunshine Coast Public Lighting Project**

Regarding Stocklands Development's Aura precinct, Council has previously provided formal advice to Stocklands, and their electrical designers J&P Richardson, that Council will accept Rate 3 LED street lighting from this development. We would consider using the OrangeTek – ARIAMED Lantern if these fittings were included on the National Load Tables. This is not a product endorsement, rather an indication that we would consider the use of the ARIAMED product in this application.

Should you wish to discuss, please contact me on 07 5420 8026.

Yours sincerely

Matt Dagan  
**PROJECT OFFICER**
