To whom it may concern,

Support for the inclusion of the Arialed 30 to 140 LED's on the National Load Table

We have been engaged by Stockland Developments for the first stages of their Aura development at Caloundra South. The overall site is 23 square kilometres consisting of more than 20 000 new home sites that will be constructed over three decades.

Sunshine Coast Council have approved the use LED road lighting connected as Rate 3 and Stockland Developments are currently evaluating the use of the Arialed range of fittings on major traffic routes throughout the development that require category "V" lighting, however the use of these fittings is dependent on the fittings being included on National Load Table.

The specific models we intend to use is the Orange tek Arialed 40 Led 350mA (45w) and Orange tek Arialed 40 Led 700mA (90w).

Should you require any further information or clarification please do not hesitate to contact the undersigned.

Yours faithfully

Gavin Wenzel

Technical Officer

J & P Richardson Industries Pty Ltd

"A Family owned company providing Electrical Services since 1958."
