Dear Dean,

INCLUSION OF ORANGETEK LUMINAIRES TO THE AEMO LOAD TABLES

Wollondilly Shire council is considering the installation of OrangeTek LED luminaires in a modern street lighting system. The installation aims to increase energy efficiency of public lighting assets and provide costs savings to Council.

Luminaire models considered:

- OrangeTek IGINIS MINI 20 LED 13W
- OrangeTek IGNIS MINI 20 LED 28W

For the luminaires to be a part of the public street light network in NSW the device load must be included in the AEMO load table. May the process for inclusion please be undertaken as to assist council with the new energy efficient asset rollout.

Kindly may Wollondilly Shire Council be advised when the inclusion has been made.

Yours sincerely,

Mitchell Keats
Project Delivery Officer – Civil Works
