

Notice of an investigation into the occurrence of an unintended scheduling result in the Victorian gas market on gas day 4 June 2015

This Notice is to advise that AEMO is investigating whether an unintended scheduling result occurred on gas day 4 June 2015 in the Victorian declared wholesale gas market.

The results of the 2:00 PM operating schedule are under investigation with respect to whether equally beneficial bids were not scheduled to the same extent for the Longford system injection point.

In order to complete the investigation an assessment of the financial effect on Market Participants is required. This assessment cannot be made until after final settlement statements are issued on 24 July 2015.

AEMO expects to conclude its investigation and publish its decision by 14 August 2015.

Notice Date: 3 July 2015
