Dear AEMO

RE: Draft Distributed Energy Resources Information Guidelines

APA appreciates the opportunity to provide comment on AEMO's Draft Distributed Energy Resources Information Guidelines.

APA operates the Murraylink and Directlink Interconnectors, which are classified as Transmission Network Service Providers (TNSPs), and captured under the DER Information Guidelines as a NSP.

APA is seeking clarity on obligations arising from the DER Information Guidelines with regard to:

- Initial and ongoing reporting requirements for NSPs with no DER connected to their network.

If you require further information or wish to discuss this submission, please contact Naomi Donohue at naomi.donohue@apa.com.au or (07) 3223 3323.

Sincerely

Naomi Donohue
Compliance Manager, Power
APA Group
