## 1. MSATS Procedures: CATS

Section	Description	Participant Comments
2.1.(l)	New section added to clarify the communication of the identification of incorrect NMI	Red and Lumo support this change and have no further comment.
2.4.(c)	Updated to define timeframes for updating datastreams in MSATS	Red and Lumo support this change and have no further comment.
2.4.(d)	Updated to define timeframes for updating datastreams in MSATS	Red and Lumo support this change and have no further comment.
2.4.(e)	Updated to define timeframes for updating datastreams in MSATS	Red and Lumo support this change and have no further comment.
2.4.(f)	Updated to define timeframes for updating datastreams in MSATS	Red and Lumo support this change and have no further comment.
2.4.(h)	Updated to define timeframes for updating datastreams in MSATS	Red and Lumo support this change and have no further comment.
2.5.(a)	New section added to define the dates MPs must use when updating MSATS about remote de-energisations	<p>Red and Lumo question the change from the term “connection point” to “meter.” Connection point is used in a range of other sections in the procedures and is a defined term. We believe that this creates a potential confusion.</p> <p>Furthermore Red and Lumo believe that the Proposed Change Date should be the date the site is de energised to align with the re energisation requirements on remote connections and disconnections.</p>
2.5.(b)	New section added to define the dates MPs must use when updating MSATS about remote re-energisations	See comment 2.5(a) related to connection point.
4.18	Updated to clarify the LNSP’s obligations in relation to creating Embedded Network Codes and ENM’s obligations in relation to application of the Embedded Network Code and data provided to AEMO upon appointment	Red and Lumo support this change and have no further comment.

## 2. MSATS Procedures: WIGS

Section	Description	Participant Comments
Version	Updated to align version numbering with MSATS: CATS procedures	Red and Lumo have no comment on this change.

## 3. Metrology Procedure: Part A

Section	Description	Participant Comments
3.1.(a)	Update to remove the word 'relevant'	Red and Lumo have no comment on this change.
3.1.(b)	Update to remove the word 'relevant'; add requirements of AS60044.3 or IEC61869.1 and IEC61869.2; and detail what each topic the part of the standard covers	Red and Lumo have no comment on this change.
3.1.(c)	Update to remove the word 'relevant'; add requirements of IEC61869.1 and IEC61869.3; and detail what each topic the part of the standard covers	Red and Lumo have no comment on this change.
3.1.(d)	Update to include International Standards covered in 3.1.(b) and 3.1.(c).	Red and Lumo have no comment on this change.
12.5.(a)	Removal of obsolete standard AS2490	Red and Lumo have no comment on this change.
12.5.(b)	New section added to detail Sample Test Plan settings	Red and Lumo have no comment on this change.
12.5.(c)	New section added to specify when a test sample is deemed to have passes the verification test	Red and Lumo have no comment on this change.
12.5.(d)	New section added to specify when the steps to be followed after each round of verification	Red and Lumo have no comment on this change.

12.5.(e)	Update to specify that verification tests must be conducted at least one every 12 months	Red and Lumo have no comment on this change.
----------	--	--

## 4. Metrology Procedure: Part B

Section	Description	Participant Comments
2.6	Update to include additional substitution type 69	Red and Lumo support this change and have no further comment.
5.3.9	Addition of substitution type 69: Linear Interpolation	Red and Lumo support this change and have no further comment.

## 5. Service Level Procedure Meter Data Provider Services

Section	Description	Participant Comments
2.4.1(ix)	New section added to define an obligation to activate datastreams when energy is recorded from a metering installation while the NMI status is not Active	Red and Lumo support this change and have no further comment.
2.4.1(x)	New section added to define an obligation to deliver validated metering data to market participants when datastreams are active	Red and Lumo support this change and have no further comment.
4.2(g)	Amend outdated rule reference	Red and Lumo support this change and have no further comment.
6.4.1(c)	Amend outdated rule reference	Red and Lumo support this change and have no further comment.
7.3(b)	Amend outdated rule reference	Red and Lumo support this change and have no further comment.

## 6. Service Level Procedure Meter Provider Services

Section	Description	Participant Comments
4.2(a)(iii)	Amend outdated rule reference	Red and Lumo support this change and have no further comment.

5.2(a)	Updated to incorporate additional clause reference for timeframes for metering installation malfunction identification and rectification.	Red and Lumo support this change and have no further comment.
--------	---	---

## 7. Service Level Procedure Embedded Network Manager

Section	Description	Participant Comments
2.1.2.(d)	New section added to define an obligation that the EN for which the ENM has been appointed has an exemption by the AER.	ensure the embedded network owner has the benefit of an exemption from the AER from the requirement to be registered as a Network Service Provider.  Change to  ensure the embedded network owner has the benefit of an exemption from the AER from the requirement to be registered as a Network Service Provider.
4.2.1.	Updated to clarify ENM's obligations with respect to DLFs.	Red and Lumo support this change and have no further comment.
4.2.2.	Updated to clarify ENM's obligations with respect to DLFs.	Red and Lumo support this change and have no further comment.
4.3.3.(a)	Updated to clarify ENM's obligations with respect to Network Tariff Codes.	Red and Lumo support this change and have no further comment.

## 8. Exemption Procedure Meter Installation Malfunctions

Section	Description	Participant Comments
1.1.	Updated to incorporate additional clause reference for timeframes for metering installation malfunction identification and rectification.	Red and Lumo have no comment on this change.

2.2.	Updated to incorporate additional clause reference for timeframes for metering installation malfunction identification and rectification.	Red and Lumo have no comment on this change.
Appendix A	Updated to incorporate additional clause reference for timeframes for metering installation malfunction identification and rectification.	Red and Lumo have no comment on this change.
Appendix B	Updated to incorporate additional clause reference for timeframes for metering installation malfunction identification and rectification.	Red and Lumo have no comment on this change.

## 9. Other Issues Related to Consultation Subject Matter
