Subject: Tariffs

Peter

As discussed at our recent meeting, it would be the Department of Planning, Transport and Infrastructure's preference that any LED luminaire presented to the department for the installation on its roads, have a max load agreed by the Australian Energy Market Operator (AEMO) in order to establish an energy tariff and in turn appear on the SA Power Network's (ETSA) Network Tariff & Negotiated Services document.

This would include the Unilumin UNISTAA-04-01 (240W), UNISTAA-02-01 (150W), UNISTWF-0009 (28W & 35W), UNISTAA-03-01 (200W).

Rick
