

Estimate payments and volumes for RERT activation on 17 December 2020

On 17 December 2020, AEMO activated reserves in NSW.

AEMO activated reserves due to a forecast Lack of Reserve Condition 2.

Estimated payments and volumes activated are set out in the table below.

Actual payments and volumes activated will be published in AEMO's quarterly RERT report due in February 2021.

In activating RERT, AEMO followed the Interim Supply Scarcity Procedure¹ and determined that no directions or clause 4.8.9 instructions would have avoided the need to active RERT.

17 December 2020

Region	Estimated volume MWh	Estimated payments \$
NSW	44.3 MWh	\$199,500

This report is a requirement of clause 3.20.6 (a) of the National Electricity Rules.

Publication date – 22 December 2020
