

On 14 June 2022, AEMO activated Reliability and Emergency Reserve Trader (RERT) reserves in New South Wales.

AEMO activated reserves due to a forecast Lack of Reserve (LOR) Condition 3.

Estimated payments and volumes activated are set out in the table below.

Actual payments and volumes activated will be published in AEMO's quarterly Reliability and Emergency Reserve Trader report due in August 2022.

In activating RERT, AEMO followed the Interim Supply Scarcity Procedure¹ and used reasonable endeavours to minimise the cost of actions taken, including the use of lower cost directions and clause 4.8.9 instructions before activating RERT, where possible.

14 June 2022

Region	Estimated volume (MWh)	Estimated payments (\$)
New South Wales	900 MWh	\$21,600,000

This report is a requirement of clause 3.20.6 (a) of the National Electricity Rules.

Publication date – 21 June 2022
