FAO: Tony Fagan – Queensland Sales Manager

Dear Tony,

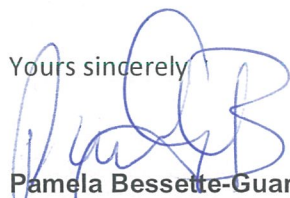

Subject: Use of Aldridge Traffic Systems - iCells and RTUs on unmetered loads within Energex operational region

City of Gold Coast Council (City) as a Lighting Network Service Provider has previously and may install (subject to the City's procurement policy and process) lighting on the unmetered network within our area of operation. As a consequence, the iCell device and RTU's would be used to control this lighting to provide performance monitoring, two way control, asset management /renewal , usage/load profile as well as enable reductions in energy and greenhouse emissions.

To enable these initiatives to benefit the City, it will be necessary to include them within the AEMO load tables.

Therefore, the City supports your submission to include these iCells in the Load Table. Please advise when they have been published.

Yours sincerely

Pamela Bessette-Guard
Executive Coordinator
Energy Management Program
