**Re: Submission to include WE-EF Lighting ETC340-GB Luminaires into the National Electricity Market Load Table for Unmetered Connection Points**

Dear David,

At the request of ACT Government Suburban Land Agency, we seek that approval be given for the inclusion of the WE-EF luminaire ETC340-GB LED 12/24W / 700 mA, to be included in the National Electricity Market Load Table.

The Nominal Rating for the NEM load table as per test report is 28.96W. The products was tested without any control devices such as photocells.

Included for our submission are documents as follows:

- Letter of Support from the ACT Government Suburban Land Agency
- TUV Rheinland test report 60395203 001
- Product Data Sheet for the product family

We thank you for your consideration in including these WE-EF ETC340-GB luminaires on the NEM Load Tables. We trust the submission meets your approval requirements. However, should there be any queries or if you require any further information, please do not hesitate to contact me.

Kind regards,

Stefan Kisser
