Dear Nathan,

**Submission of GE LED 35W Lamp for inclusion on the National Electricity Market Load Table**

Ausgrid supports and intends to use the following LED retrofit lamp from Light Source Solutions and ask for it to be included on the AEMO as unmetered Connection Points in accordance with the unmetered guideline.

Ausgrid understands and accepts that the existing MV ballast needs to be removed or bypassed to achieve the GE LED 35W lamp's correct load consumption.

Device Type: **GE LED 35W Lamp**  
Model #TSL76E103-CW-E27

Regards,
