Subject: Application to include 4 x Philips Tango Flood Lights onto AEMO Load Table

Dear David,

Signify Australia Ltd has been invited to seek inclusion of the following LED Flood Lights in the NEM load table by Ausgrid, per the attached letter.

The following fittings are being put forward for inclusion:

Description	Average Tested
	Wattage
BVP383 LED130/NW 100W	106.66W
BVP384 LED472/NW 360W	365.84W
BVP383 LED260/NW 200W	205.94W
BVP381 LED65/NW 50W	53.79W

The following documents have been included in this submission:

- Supporting document from Ausgrid requesting inclusion onto AEMO load table
- LCP BVP383 LED130/NW 100W: 211106LCP
- LCP BVP384 LED472/NW 360W: 211107LCP
- LCP BVP383 LED260/NW 200W: 211024LCP
- LCP BVP381 LED65/NW 50W: 211023LCP
- Datasheet for Tango Floodlights

The luminaires were tested using a NEMA base shorting cap, and the PE Cell load was not

included in the Test Reports.

## (s) ignify

Each luminaire will have marking complying with TS 1158.6. This will be achieved by placing a label with indelible ink on an area of the luminaire that is visible when the luminaire is installed.

I appreciate your assistance with this application for inclusion onto the AEMO Load table.

Kind Regards,

D. Lipiz
