Re: Candela Toorak Major 72LED 70W & 140W Luminaires

The City of Whittlesea is preparing a bulk changeover of 300 x 150W HPS & 150 x 250W HPS decorative streetlights with suitable LED replacements. Given its commitment to sustainable, energy efficient street lighting, the City of Whittlesea supports Vicpole's initiative to seek approval of the 72LED 70W & 140W Toorak Major top entry luminaires.

The significant reduction in power consumption, from 150W to 70W & 250W to 140W, will support Council's drive to replace inefficient street lights with energy efficient street lighting and will substantially reduce electricity consumption and greenhouse gas emissions, helping the City of Whittlesea to achieve its zero net emissions target by 2023.

Should you wish to discuss this matter further, please do not hesitate to contact the undersigned.
