

Retail Electricity Market Glossary and Framework- B2B items – Final stage submissions

	Participant Name		New Clause No	Comments	Response
1	Secure Meters		3.	<i>The use of different coloured text to substantiate where the Term is used is useless to the colour blind, suggest using a reference note or a type</i>	Text colour is used to denominate the material under consultation – this will be returned to black text on publication.
2	Secure Meters		Business Hours	<i>The definition for Business Hours needs to be modified as the current description refers to participant operating hours and that could be 24 hr and not Mon – Fri 8am to 6pm</i>	Change – not just B2B – revert to AEMO
3	CitiPower Powercor			<i>CitiPower Powercor recommends a definition of a Prospective Retailer is added to identify the conditions present that identify a Prospective Retailer.</i>	Change
4	UE		3	<i>Glossary – “Business Day”: Needs greater clarification about public holidays. Suggest change text to “Any weekday other than public holidays applicable to the Site/<i>Jurisdiction</i> to which the B2B Transaction applies”</i>	Change
5	ACTEWAGL		General Note	<i>Please make “Initiator” consistent throughout the documents, sometimes no capital, sometimes with.</i>	Change

6			<i>Technical Delivery</i>	<i>Xml payload – no details provided; schema examples only have csv; examples also have “Payload” as an element, but descriptions say it is not; what format & structure and fields for xml;</i>	Refer to Technical Specification?
7	<i>Pacific Hydro</i>		2.2.4	<i>For the purposes of clarity, the RoLR Procedures delineate which parts are made under which part of the NER.</i>	Editorial – change accepted
8	<i>Pacific Hydro</i>		3	<i>Please remove the colour coding and introduce a column to indicate B2B only, Not B2B, RMP. This avoids issues with printing the document.</i>	Text colour is used to denominate the material under consultation – this will be returned to black text on publication.
9	<i>Pacific Hydro</i>		3	Business Document: need to add the following: SiteAccessRequest PreInstallationDataRequest <i>PreInstallationDataResponse</i>	Change – accepted
10	<i>Pacific Hydro</i>		3	Customer and Site Details The data elements identified in a Customer and Site Details Notification. Customer and Site Details Changes A change to one or more data elements identified in a Customer and Site Details Notification. <i>These terms and definition are written such that it could be interpreted this is a single transaction. However the Customer and Site Details Notification Procedure identify two separate transactions; CustomerDetailsNotification and SiteAccessNotification.</i>	While we agree that this inference could be made close inspection of the procedure – which is required of any participant needing to reference one or both of these transactions will reveal that there are in fact 2 transactions. Therefore no change is required.

11	<i>Pacific Hydro</i>		3	<p>Notification A B2B Transaction that does not require a corresponding reply. Could be a Meter Data, Customer and Site Details or a Notified Party Notification.</p> <p><i>Please explain the nature of ‘reply’ in reference to these examples. I understand all of these transactions would receive a Business Receipt and a Business Accept Reject.</i></p>	Change – clarification required.
12	<i>ActiveStream</i>		3	<p>Suggest consideration to the inclusion and definition of</p> <ul style="list-style-type: none"> • Network Device <p><i>Network Device Number</i></p>	Change
13			3	<p>Suggest consideration to the inclusion and definition of</p> <ul style="list-style-type: none"> • Control Equipment • <i>Control Equipment Number</i> 	Change
14	<i>AGL</i>			<p>AGL queries the benefit of the amendment where a defined term used in one procedure is only defined in that procedure. The whole point of the glossary was to consolidate terms to either the Rules or glossary.</p> <p>There is a small risk that a singly defined term might be re-used in another procedure leading to varying definitions, which is what is being avoided.</p> <p><i>AGL suggests that any defined term (whether used in multiple procedures or a single procedure) be included in the Glossary.</i></p>	Comment
15	<i>AGL</i>			<p>Temporal reference to roles</p> <p>In B2B the term for a new/incoming retailer is ‘Prospective Retailer’ and that term is used extensively within those documents.</p> <p>Suggest that the final sentence be amended to</p> <p><i>... is referred to as ‘New’ or ‘Prospective’.</i></p>	Change

16	Origin Energy		3	<div> <div>Connection Date</div> <div>The date the connection point is connected to a network.</div> </div> <p><i>Could be made clearer as to it being the date the connection point is first energised – this would avoid any possible date issues for the provision or expectations of market changes. A network could complete work to connect a connection point to their network and leave it isolated until the metering work is completed and energised. From a network date this would suggest the connection date at the NMI was the date their work was completed, however from a FRMP and MP aspect until the meter is installed there is no expectation of metering data or standing charges for the site</i></p>	Change – is this a B2B reference?
17	Endeavour Energy		3	<p>Meter Serial ID should be highlighted green as it is used on the NoMW</p> <div> <div>Meter Serial ID</div> <div>A faceplate serial number that uniquely identifies each meter associated with</div> </div>	Text colour is used to denominate the material under consultation – this will be returned to black text on publication.
18	Endeavour Energy		3	<p>Should be highlighted green as it used with service orders.</p> <div> <div>Special Meter Reading</div> <div>An Actual Meter Reading taken on a date other than a Scheduled Reading Date</div> </div>	Text colour is used to denominate the material under consultation – this will be returned to black text on publication.
