IIR response template for IN003/20 (Gas Life Support) – Responses to be emailed to grcf@aemo.com.au by due COB (AEST) Monday 1 June 2020.

Review comments submitted by: Origin Energy   Date: 28th May, 2020

Contact Person: *Mario Iogha*

Please complete sections 1 and 2.

Section 1 - General Comments on the Proposed Procedure Change

Topic	Please Provide Response Here
Sections 1 to 8 of the IIR sets out _AEMO's critical examination of the proposal._ Does your organisation support AEMO's examination of the proposal? If no, please specify areas in which your organisation disputes AEMO's examination of the proposal and include information that supports your organisation's rationale for not not supporting AEMO's examination.	Whilst we reiterate this initiative is a net cost for Origin, we acknowledge the approach AEMO have taken to examine the overall industry net cost estimate and the support received from participants.
Section 9 of the IIR sets out _AEMO's recommendation_. Does your organisation support AEMO's position to recommend the procedure changes?	Origin recommends AEMO implements this IIR post Q4 2021 due to several Retail initiatives currently being prioritised. Q4 2022 is the optimum time to implement Gas Life Support. The deferral of 5MS is proposed for 1 July 2022. Should this rule change take affect this presents a risk to deliver Gas Life Support prior to 1 July 2022. Compounding this are other initiatives, such as Wholesale Demand Response, Energy Consumer Rights, MSATS

	SD review (including Planned Interruption) and Customer Switching are proposed to be delivered 2021 or spill into 2022. Therefore, Q4, 2022 or later presents the least risk and optimal time to deliver for Gas Life Support. In addition, all gas market changes should be grouped together across East Coast and WA to align schemas at the same time.

Section 2 - Feedback on the documentation changes described the Attachments of the IIR.

Participants are to complete the relevant columns below in order to record their response.
