PPC response template for IN018/20 (Q4 2021 bundled release residual tidy-up) – Responses to be emailed to grcf@aemo.com.au by 18 February 2021.

Review comments submitted by: Origin Energy

Date: 18th February 2021

Contact Person: Mario Iogha

Please complete sections 1 and 2. Section 3 is optional.

Section 1 - General Comments on the Proposed Procedure Change

Topic	Please Provide Response Here
Sections 1 to 9 of the PPC sets out details of the proposal. Does your organisation support AEMO's assessment of the proposal (i.e. does your organization believe that AEMO has adequately described the requirements and surrounding context of the proposal)? If no, please specify areas in which your organisation disputes AEMO's assessment (include PPC section reference number) of the proposal and include information that supports your organisation's rationale for not supporting AEMO's assessment.	Origin has reviewed and provide comment as described in below sections.

Section 2 – Comments on the changes described in Section 3 of the Proposed Procedure Change

	Participants are to complete the relevant columns below in order to record their response.		
Section of PPC	Issue / Comment	Proposed text ~~Red strikeout~~ means delete and <u>blue underline</u> means insert	AEMO Response (AEMO only)
Section 3.1: Delete T71 transaction	In principle Origin acknowledges the removal of Transaction 71 and the requirements for a six-month refresh. Origin is keeping an open mind to feedback participants may have as part of this consultation on the benefits T71 may have for their organisation. Origin will assess this feedback once AEMO prepares the IIR report.		
Section 3.2: Delete T72 "Update to Meter Route" transaction	Noted – removal of Transaction 72 and can be amended to implement the changes to CDN and CDR.		
Section 3.3: Add event codes for CDN/CDR			

Section 3.4: Reword clause 4.6.2	Origin support the inclusion of this drafting clause to provide clarity.		
Section 3.5: Align data dictionary with aseXML schema	Origin acknowledges that clarification is needed regarding how certain aseXML schema elements were to be used (e.g. the "ManagementContactDetail" aseXML schema element allows for any number of phone numbers to be provided, but the build pack allows for at most two).

Origin recommends a review of the wording proposed in the allowable values within the BP3 B2B Systems Interface definitions and FRC B2B Systems Interface Definitions:

For example:

-CustomerEmailAddress
-ManagementContactDetail/EmailAddress
-ManagementContactDetail/ PhoneNumber 1
-ManagementContactDetail/ PhoneNumber 2

The wording states that 'at most" one/two must be provided. This can imply, for example, that at least 2 email address <u>must</u> be provided. It doesn't necessarily read that only up to 2 email address can be provided | Below wording is an example for Phone number Allowable values. Similar wording should be in place for other allowable values.

~~While the aseXML schema allows for any number of phone numbers to be provided, at most two must be provided under the Build Pack constraints.~~

<u>While the aseXML schema allows for any number of phone numbers to be provided, a maximum of two is permitted under the Build Pack constraints</u> | |

Section 3.6: Manifest errors and other non-controversial changes			
Section 3.7: Diagram changes			
Section 3.8: CustomerTitle element	Noted		

Section 3 – Corrections to typographical or administrative errors in collating the documents

Participants are to complete the relevant columns below in order to record their response.			
Ref #1 – B2B Service Order Specifications – Part 1			
RMP Clause #	Issue / Comment	Proposed text ~~Red strikeout~~ means delete and <u>blue underline</u> means insert	AEMO Response (AEMO only)
Ref #2 – B2B Service Order Specifications – Part 2
