1. Context

This template is to assist stakeholders in giving feedback about the changes detailed in the initial draft procedures associated with the Metering ICF Package Changes consultation.

The changes being proposed are because of NER rule changes which have occurred requiring changes to AEMO’s Retail Electricity Market Procedures and the following proposed changes by proponents and AEMO to implement recommended process improvements.

2. MSATS Procedures: CATS (EFF – 8 Mths Notice)

Section	Description	Participant Comments
2.4.(s)	Updated to include a new sub clause(s) for obligation on MDP to provide relationship mapping between Register ID and Datastream Suffix.	<p>TasNetworks supports the reversion of the requirement to match Register ID with NMI Suffix, however, does not support the requirement to provide a mapping of Register ID to Datastream Suffix.</p> <p>TasNetworks expects that participants would currently have system logic that maps the NMI Suffix in the NEM12 file to the corresponding meter register MDM Contributory Suffix record as these have to match, so does not see any value in having to provide additional relationship mapping details.</p> <p>It is understood that AEMO also do not need such mapping details for their new 5MS MDM solution or for settlement purposes to map the NEM12 file with the respective meter register record based on the NMI Suffix. TasNetworks therefore question the need for MDP’s to provide a register mapping guide.</p>
