Dear Ms Zibelman

Reliability Standard Implementation Guidelines (RSIG), Medium Term Projected Assessment of System Adequacy (MT PASA) Process Description, Energy Adequacy Assessment Projection (EAAP) Guidelines and Spot Market Operations Timetable

Ergon Energy Queensland Pty Ltd (Ergon Energy Retail) welcomes the opportunity to provide a submission to the Australian Energy Market Operator (AEMO) in response to the RISG, MT PASA Process Description, EAAP Guidelines and Spot Market Operations Timetable Draft Report.

Ergon Energy Retail notes the increasing prevalence of generation capacity from some generators (particularly semi-scheduled renewable generators) being reduced or switched off due to technical constraints in transmission and distribution networks. We consider it would be beneficial for the market to be better informed of the timing, duration and location of these constraints to the dispatch of generation and forecast capacity reduction (percentage) or reduction in output (in MW). This information could be provided for each affected unit (or dispatchable unit ID (DUID)) in the MT PASA Process Description document in the table titled "MTPASA_CONSTRAINTSUMMARY".

Publication of this additional information will assist participants to better understand, quantify and potentially resolve issues associated with these generators.

Should the AEMO require additional information or wish to discuss any aspect of this submission, please contact me on the details below.

Yours sincerely
