## 1. Context

This template is to assist stakeholders in giving feedback about the changes detailed in the initial draft procedures associated with the 5MS B2M Package Changes consultation.

The changes being proposed are because of NER rule changes which have occurred requiring changes to AEMO’s Retail Electricity Market Procedures and the following proposed changes by proponents and AEMO to implement recommended process improvements.

## 2. MSATS Procedures: CATS

Section	Description	Participant Comments
7.1.4(b)	Updated to include a new field “Proposed Change Date”	AGL agrees with including a field for a proposed change date field.
7.1.4(c)	Added a new requirement clause for the initiating FRMP	<p>AGL suggests that additional text should be associated with the proposed date field to clarify that the CR operates on the actual date of the initial change, rather than the date proposed in the transaction.</p> <p>AGL suggest that the (c) be amended in some fashion like:</p> <p>(c) A date is required for transaction validity. May be any date. Note however that the transaction will operate on the actual date of the transaction being reversed, <b>not</b> the date in the proposed date field.</p> <p><del>May align the Proposed Change Date to the Current Date or the Actual Change Date of the initial Change Request.</del></p>

Section	Description	Participant Comments
7.1.7 Table 7-B	Updated table to include notification for the new RP on COMPLETED status of the CR 1060	AGL agrees with the change
7.1.7 Table 7-C	Updated table to include notification for the new RP on COMPLETED status of the CR 1061	AGL agrees with the change

### 3. MSATS Procedures: WIGS

Section	Description	Participant Comments
Version	Updated to align version numbering with MSATS: CATS procedures	AGL supports the Version numbering update

#### 4. Meter Data File Format Specification

Section	Description	Participant Comments
3.3.1(b)	Updated sub clause (b) to include a fix for ICF_025 Removal of 'N' Metering Data Quality Flag	AGL agrees with the change

#### 5. MSATS Procedure: MDM Procedure

Section	Description	Participant Comments
3.2.3(b)	Added new sub clause (b) to add energy for all Cross Boundary inflows to the NSLP calculation	AGL agrees with the change, although would like clarification as to whether the cross boundary outflows are clearly captured in this clause 3.2.3 or clarification as to where these outflows are captured.

## 6. Metrology Procedure: Part B

Section	Description	Participant Comments
11.3.3(c)	Updated details of Weighting Factor equation	AGL agrees with the change, but would however like to see a clear obligation for AEMO to review those scaling factors every 5 years to ensure their validity, especially as the number of sample meters may change and increased information resulting from interval meters and 5ms may show changes.
11.4(b)	Updated NSLP equation	AGL agrees with the change, but would like to understand how cross border outflows fit into the equation.

## 7. Other Issues Related to Consultation Subject Matter

Heading	Participant Comments
<p>Are there better options to accommodate the change proposals which better achieve the required objectives? What are the pros and cons of these options? How would they be implemented?</p>	
<p>What are the main challenges in adopting these proposed changes? How should these challenges be addressed?</p>
