1. Context

This template is to assist stakeholders in giving feedback about the changes detailed in the initial draft procedures associated with the 5MS B2M Package Changes consultation.

The changes being proposed are because of NER rule changes which have occurred requiring changes to AEMO’s Retail Electricity Market Procedures and the following proposed changes by proponents and AEMO to implement recommended process improvements.

2. MSATS Procedures: CATS

Section	Description	Participant Comments
7.1.4(b)	Updated to include a new field “Proposed Change Date”	<p>Agree with the inclusion of the Proposed Change Date[Mandatory] as it is logical and is in line with the format of all other CRs in the 1000 series.</p> <p>Additionally it is recommended for the role of RP to be defined as mandatory as per the MSATS 47.00 Section 4.3(8) for CR 1060 and 1061</p>
7.1.4(c)	Added a new requirement clause for the initiating FRMP	<p>Jemena suggests the narrative 'May align' is changed to 'Must align' as it is a reversal transaction where the Proposed Change Date must be exactly the same as the proposed date in the Original Change Request transaction. Additionally there is already an MSATS Error Code (1015) for use when the reversal date does not match the actual change date of the related CR.</p> <p>By allowing Current Date to be used, it creates ambiguity for interpretation of data provided in the 'Current Date' by the rest of the industry. Please note</p>

Section	Description	Participant Comments
		there is no definition in the RETAIL ELECTRICITY MARKET PROCEDURES – GLOSSARY AND FRAMEWORK v3.0 which has an effective date of 1 July 2021
7.1.4(d)	The initiating FRMP: (d) may withdraw a reversal of retailer transaction at any time prior to the reversal being completed	Suggest the following narratives: The initiating FRMP: (d) may withdraw a reversal of retailer transaction at any time before the CR status in MSATS has reached one of the following Status: REJECTED, CANCELLED, COMPLETED
7.1.7 Table 7-B	Updated table to include notification for the new RP on COMPLETED status of the CR 1060	Agree
7.1.7 Table 7-C	Updated table to include notification for the new RP on COMPLETED status of the CR 1061	Agree

3. MSATS Procedures: WIGS

Section	Description	Participant Comments
Version	Updated to align version numbering with MSATS: CATS procedures	Agree

4. Meter Data File Format Specification

Section	Description	Participant Comments
3.3.1(b)	Updated sub clause (b) to include a fix for ICF_025 Removal of 'N' Metering Data Quality Flag	Agree

5. MSATS Procedure: MDM Procedure

Section	Description	Participant Comments
3.2.3(b)	Added new sub clause (b) to add energy for all Cross Boundary inflows to the NSLP calculation	Changes are not applicable for Jemena as we are not MDP or MPB for the Cross Boundary meters

6. Metrology Procedure: Part B

Section	Description	Participant Comments
11.3.3(c)	Updated details of Weighting Factor equation	Change doesn't apply to Victoria (only QLD & NSW).
11.4(b)	Updated NSLP equation	NSLP calculation by Profile Area has been modified to include Cross Boundary inflow levels. Changes are not applicable for Jemena as we are not MDP or MPB for the Cross Boundary meters

7. Other Issues Related to Consultation Subject Matter

Heading	Participant Comments
Are there better options to accommodate the change proposals which better achieve the required objectives? What are the pros and cons of these options? How would they be implemented?	
What are the main challenges in adopting these proposed changes?	

Heading	Participant Comments
How should these challenges be addressed?
