CONSULTATION – Second Stage

CONSULTATION PARTICIPANT RESPONSE TEMPLATE

Participant: *Endeavour Energy*

Completion Date: *01/06/2022*

Table of Contents

1. Service Order Process

Old Clause No	New Clause No	Comments
	2.3.1	For better clarity, and to avoid confusion, we suggest that subclause a and b be combined.
		We suggest that clause 2.3.1.a be deleted and clause 2.3.1.b be updated to:
		The Initiator of a Re-energisation or De-energisation Service Order for metering installation types 1 to 4 must raise a Notified Party transaction so that:
		(i) The DNSP is notified when the Initiator is requesting a Re-energisation or De-energisation service from the MPB.
		(ii) The current MPB is notified when the Initiator is requesting a Re-energisation or De-energisation service from the DNSP.

2.   One Way Notification Process

Old Clause No	New Clause No	Comments
	4.2.6.a	For consistency, and to avoid any confusion, we suggest that the term 'shared fuse arrangement' be used as opposed to 'shared fuse status'. We suggest the third sentence in clause 4.2.6.a be updated to: The key information provided will include the date that the shared fuse arrangement was determined and a value indicating the shared fuse arrangement for the connection point (identified by the NMI)
