## 1. Context

This template is to assist stakeholders in giving feedback about the options detailed in the issues paper associated with the Removal of Controlled Load Profile - NSW expedited consultation.

The changes being proposed are because of changes to the NSW jurisdictional metrology material which have occurred requiring changes to AEMO's Retail Electricity Market Procedures.

## 2. Questions

	Participant Comments
Do you have any comments to make in relation to the proposal?	The draft report focusses on the procedural and operational mechanics of transitioning the meters from the Controlled Load Profile (CLP) but does not describe any consideration of the impacts which may occur to participant energy allocations and therefore participant energy allocations or the effect this will have on the Net System Load Profile when the Controlled Load profile is removed.
Do you have any comments to make regarding the fast-tracked approach to the procedure consultation?	

### 3. Other Issues Related to Consultation Subject Matter

#### Participant Comments

AGL notes that there is a plan to amend the NSLP effective September 2024 and changing the CLP will impact the outcomes of the NSLP as well as participant allocations.

AGL would be concerned that any changes to the NSW Hot Water CLP are effected sufficiently prior to the NSLP change date or sufficiently after the NSLP change date, so that any impacts on the NSLP are not muddied by CLP changes.
