

INFORMATION EXCHANGE COMMITTEE MEETING

FOR DECISION

SUBJECT: VERSION 3.3 B2B PROCEDURES CONSULTATION

AGENDA ITEM: 9

1. PURPOSE

To seek approval from the IEC on v3.3 of the B2B Procedures and on the publication of the Final Report Consultation Pack for the Q3 B2B Procedure consultation.

2. SUMMARY

At the August 2019 IEC meeting, the IEC approved a consultation on a number of procedure-only B2B Procedure changes that the Business-to-Business Working Group (B2B-WG) and participants had identified:

- To amend the Miscellaneous Service Order definition in the Service Order Process to clarify its use case;
- To amend the One Way Notification Process clauses concerning the Notices of Metering Works (NOMW) Removed Reading process to incorporate changes made to the B2B Guide in February 2019; and
- To amend the definition of the allowed values for the “LifeSupportStatus” field of the Life Support Notification (LSN) transaction in the Customer and Site Details Notification Process to incorporate changes made to the B2B Guide in February 2019.

During consultation, one additional change was identified:

- To clarify that the “CoordinatingContactName” field must refer to a contact person, not a contact business, in line with the definition of the PERSON NAME format in the B2B Procedure: Technical Delivery Specification, as suggested by TasNetworks in their response to the initial consultation paper.

No participant has objected to the proposed changes or to the proposed list of costs and benefits for each change. As such, the changes can be assumed to meet the National Electricity Objectives, the B2B Factors, and the B2B Principles.

3. RECOMMENDATIONS

It is recommended that the IEC endorse the publication of the Final Report Consultation Pack, including the draft B2B Procedures v3.3.
